

**PACIFIC INSTITUTE OF MEDICAL SCIENCES ,UMARDA ,UDAIPUR , RAJASTHAN**  
**CLINICAL POSTINGS SCHEDULE OF THIRD PROFESSIONAL MBBS PART - 1 (BATCH 2019)**

DATE		DAY		10 am to 1 pm						
Batches		A	B	C	D	E1 & E2	E2 & E1	F1 & F2	F2 & F1	
2/21/2022	Monday	CM 5.6 Enumerate and discuss the National Nutrition Policy, important national nutritional Programs including the Integrated Child Development Services Scheme (ICDS) etc	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 2.1 Elicit document and present an appropriate history in a patient presenting with an ENT complaint	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a rauma victim including principles of triage	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DR3.2 Demonstrate the grattage test	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3 Demonstrate and document an appropriate clinical examination in a patient undergoing	DE 1.1 Enumerate the parts of the tooth.1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries	
2/22/2022	Tuesday	CM 20.1 List important public health events of last five years	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 2.2 Demonstrate the correct use of a headlamp in the examination of the ear, nose and throat EN 2.3 Demonstrate the correct technique of examination of the ear including Otoscopy EN 4.4 Demonstrate the correct technique to hold visualize and assess the mobility of the tympanic	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.	
2/23/2022	Wednesday	CM 19.2 Describe roles of essential medicine in primary health care	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epilation	EN 2.5 Demonstrate the correct technique of examination of the nose & paranasal sinuses including the use of nasal speculum Examination of oral cavity, Throat and Larynx	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.1 Describe the Principles of FIRST AID	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene	
2/24/2022	Thursday	CM 12.3 Describe the prevention of health problems of aged population	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 2.6 Demonstrate the correct technique of examining the throat including the use of a tongue depressor EN 2.7 Demonstrate the correct technique of examination of neck including elicitation of laryngeal crepitus EN 2.11 Describe and identify by clinical	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.	
		CM 13.1 Demonstrate ability to use local	OP3.2 - Demonstrate document and present the	EN 2.8 Demonstrate the	OR 2.6 Describe and discuss the aetiopathogenesis,	SU17.3 Describe the	DR9.3 Enumerate the	AS5.3 Observe and describe the principles and steps/ techniques	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the	

2/25/2022	Friday	resources whenever required like in mass disaster situations & Define and describe the concept of Disaster management	correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	correct technique to perform and interpret pure tone audiogram & impedance audiogram	mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	Principles in management of mass casualties K K H Y Lecture, Small group discussion	indications and observe the performance of a slit skin smear in patients with leprosy	involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anesthesia	2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health
2/26/2022	Saturday	CM 4.3 Demonstrate and describe the steps in evaluation of health promotion and education program	OP4.8 - Demonstrate technique of removal of foreign body in the cornea in a simulated environment	EN 4.16 Observe and describe the indications for and steps involved in the performance of pure tone audiometry EN4.17 Enumerate the indications and interpret the results of an audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DR10.2 Identify spirochete in a dark ground microscopy	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics, health.
2/27/2022	Sunday	Holiday							
2/28/2022	Monday	CM 10.6 Counsel in a simulated environment, contraception and puerperal sterilisation & Enumerate and describe various family planning methods, their advantages and shortcomings	OP4.10 - Counsel patients and family about eye donation in a simulated environment	EN 2.9 Choose correctly and interpret radiological, microbiological & histological investigations relevant to the ENT disorders	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.
3/1/2022	Tuesday	CM 1.9 Demonstrate the role of effective Communication skills in health in a simulated environment	OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 2.12 Counsel and administer informed consent to patients and their families in a simulated environment	OR 2.12 Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	AS7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity
3/2/2022	Wednesday	CM 3.2 Describe concepts of safe and wholesome water, sanitary sources of water, water purification processes, water quality standards, concepts of water conservation and rainwater harvesting	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment	EN 2.10 Identify and describe the use of common instruments used in ENT surgery	OR 2.12 Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and	IM 2.9 Distinguish and differentiate between stable and unstable angina and AMI based on the clinical presentation	DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU	DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions
3/3/2022	Thursday	CM 6.4 Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods, frequency distribution	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN 2.14 Demonstrate the correct technique to instilling topical medications into the ear, nose and throat in a simulated	OR 2.12 Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic	DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	AS7.4 Observe and describe the basic setup process of a ventilator	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco

		frequency distribution, measures of central tendency and dispersion	patient with a cataract	throat in a simulated environment	of fracture shaft of femur in all age groups and the recognition and management of fat embolism	agents in non hemorrhagic stroke	changes of aging		,smoking,alcohol and other causative factors.
3/4/2022	Friday	CM 7.4 Define, calculate and interpret morbidity and mortality indicators based on given set of data	OP7.5 - To participate in the team for cataract surgery	EN 3.1 Observe and describe the indications for and steps involved in the performance of Otomicroscopic examination in a simulated environment	OR 2.12 Describe and discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism	PE 27.15 Assess airway and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting	DR12.5 Define erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment	AS7.5 Observe and describe the principles of monitoring in an ICU	DE 4.3Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
3/5/2022	Saturday	CM 7.9 Describe and demonstrate the application of computers in epidemiology	OP7.6 - Administer informed consent and counsel patients for cataract surgery in a simulated environment	EN 2.13 Identify, resuscitate and manage ENT emergencies in a simulated environment (including tracheostomy, anterior nasal packing, removal of foreign bodies in ear, nose, throat and upper respiratory tract)	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	PE 27.23 Assess for signs of severe dehydration	DR12.6 Identify and distinguish exfoliative dermatitis from other skin lesions	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the	DE 4.3Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
3/6/2022	Sunday	Holiday							
3/7/2022	Monday	CM 7.7 Describe and demonstrate the steps in the Investigation of an epidemic of communicable disease and describe the principles of control measures	OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Unicocular & Binocular)	EN 3.2 Observe and describe the indications for and steps involved in the performance of diagnostic nasal Endoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam
3/8/2022	Tuesday	CM 8.6 Educate and train health workers in disease surveillance, control & treatment and health education	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 3.3 Observe and describe the indications for and steps involved in the performance of Rigid/Flexible Laryngoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR3.2 Demonstrate the grattage test	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3Demonstrate and document an appropriate clinical examination in a patient undergoing
3/9/2022	Wednesday	CM3.3 Describe the aetiology and basis of water borne diseases /jaundice/hepatitis/diarrhoeal diseases	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 3.4 Observe and describe the indications for and steps involved in the removal of foreign bodies from ear, nose &	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones	DR8.2Identify and distinguish herpes simplex and herpes labialis from other skin lesions	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-

		diarrheal diseases		throat	leg (b) Calcaneus (c) Small bones of foot			systemic causative factors. 5.3 Identify periodontal diseases.	opiate analgesics, depolarising and non depolarising muscle relaxants	
3/10/2022	Thursday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epililation	EN 3.5 Observe and describe the indications for and steps involved in the surgical procedures in ear, nose & throat EN 4.24 Enumerate the indications observe and describe the steps in a Septoplasty	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	SU17.1 Describe the Principles of FIRST AID	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	
3/11/2022	Friday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 4.40 Observe and describe the indications for and steps involved in tonsillectomy / adenoidectomy EN 4.10 Observe and describe the indications for and steps involved in myringotomy and myringoplasty EN 4.11 Enumerate the indications describe the	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anaesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	
3/12/2022	Saturday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 3.6 Observe and describe the indications for and steps involved in the skills of emergency procedures in ear, nose & throat	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	SU17.3 Describe the Principles in management of mass casualties K K H Y Lecture, Small group discussion & SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health	AS5.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anaesthesia	
3/13/2022	Sunday	Holiday								
3/14/2022	Monday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN4.50 Observe and describe the indications for and steps involved in Tracheostomy EN4.51 Observe and describe the care of the patient with a tracheostomy	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.2 Identify spirochete in a dark ground microscopy	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management & OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics, health.	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	
		CM 10.2 Enumerate and		EN 4.1 Elicit document and present a correct history,	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability	DR10.5 Counsel in a non-	IM 2.9 Distinguish and	DE 3.3 Identify malocclusion.	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2	

3/15/2022	Tuesday	describe the methods of screening high risk groups and common health problems	OP7.5 - To participate in the team for cataract surgery	demonstrate and describe the clinical features, choose the correct investigations and describe the principles of management of Otaglia	to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	judgemental and empathetic manner patients on prevention of sexually transmitted disease	differentiate between stable and unstable angina and AMI based on the clinical presentation	3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.	Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients
3/16/2022	Wednesday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP4.10 - Counsel patients and family about eye donation in a simulated environment OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 4.6 Elicit, document and present a correct history, demonstrate and describe the correct investigations and describe the principles of management of Discharging ear	OR 13.2 Participate as a member in team for Resuscitation of Polytrauma victim by doing all of the following : (a) I.V. access central - peripheral (b) Bladder catheterization (c) Endotracheal intubation (d) Splintage	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV) DR12.2 Identify eczema and differentiate it from lichenification and changes of aging DR11.2 Identify and distinguish the dermatologic	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic stroke	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy
3/17/2022	Thursday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Uniuocular & Binocular)	EN 4.9 Demonstrate the correct technique for syringing wax from the ear in a simulated environment	OR 14.1 Demonstrate the ability to counsel patients regarding prognosis in patients with various orthopedic illnesses like a. fractures with disabilities b. fractures that require prolonged bed stay c. bone tumours d. congenital disabilities	DR12.5 Define erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment DR12.6 Identify and distinguish exfoliative dermatitis from other skin lesions	PE 27.15 Assess airway and breathing; recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting & PE 27.23 Assess for signs of severe dehydration	etiological factors in the formation of precancerous /cancerous lesions DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.	AS7.4 Observe and describe the basic setup process of a ventilator AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period
18-03-22 & 19-03-22	Friday & Saturday	Holi & Dhulandi							
3/20/2022	Sunday	Holiday							
3/21/2022	Monday	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam
BATCHES		B	C	D	E	F1 & F2	F2 & F1	A1 & A2	A2 & A1
		CM 5.6 Enumerate and discuss the National Nutrition Policy.	OP1.3 - Demonstrate the steps in performing the	EN 2.1 Elicit, document and	OR 1.1 Describe and discuss the Principles of			AS3.2 Elicit, present and document an appropriate history including medication history in a	DE 1.1 Enumerate the parts of the tooth.

3/22/2022	Tuesday	presenting with important national nutritional Programs including the Integrated Child Development Services Scheme (ICDS) etc	visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	present an appropriate history in a patient presenting with an ENT complaint	pre-hospital care and Casualty management of a trauma victim including principles of triage	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DR3.2 Demonstrate the grattage test	patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3 Demonstrate and document an appropriate clinical examination in a patient undergoing	1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries
3/23/2022	Wednesday	CM 20.1 List important public health events of last five years	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 2.2 Demonstrate the correct use of a headlamp in the examination of the ear, nose and throat EN 2.3 Demonstrate the correct technique of examination of the ear including Otoscopy EN 4.4 Demonstrate the correct technique to hold visualize and assess the mobility of the tympanic	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.
3/24/2022	Thursday	CM 19.2 Describe roles of essential medicine in primary health care	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epililation	EN 2.5 Demonstrate the correct technique of examination of the nose & paranasal sinuses including the use of nasal speculum Examination of oral cavity, Throat and Larynx	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.1 Describe the Principles of FIRST AID	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene
3/25/2022	Friday	CM 12.3 Describe the prevention of health problems of aged population	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 2.6 Demonstrate the correct technique of examining the throat including the use of a tongue depressor EN 2.7 Demonstrate the correct technique of examination of neck including elicitation of laryngeal crepitus EN 2.11 Describe and identify by clinical	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.
3/26/2022	Saturday	CM 13.1 Demonstrate ability to use local resources whenever required like in mass disaster situations & Define and describe the concept of Disaster management	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 2.8 Demonstrate the correct technique to perform and interpret pure tone audiogram & impedance audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.3 Describe the Principles in management of mass casualties K KH Y Lecture, Small group discussion	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	AS5.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anaesthesia	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health
3/27/2022	Sunday	Holiday							

3/28/2022	Monday	CM 4.3 Demonstrate and describe the steps in evaluation of health promotion and education program	OP4.8 - Demonstrate technique of removal of foreign body in the cornea in a simulated environment	EN 4.16 Observe and describe the indications for and steps involved in the performance of pure tone audiometry EN4.17 Enumerate the indications and interpret the results of an audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DR10.2 Identify spirochete in a dark ground microscopy	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics, health.
3/29/2022	Tuesday	CM 10.6 Counsel in a simulated environment, contraception and puerperal sterilisation & Enumerate and describe various family planning methods, their advantages and shortcomings	OP4.10 - Counsel patients and family about eye donation in a simulated environment	EN 2.9 Choose correctly and interpret radiological, microbiological & histological investigations relevant to the ENT disorders	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.
3/30/2022	Wednesday	CM 1.9 Demonstrate the role of effective Communication skills in health in a simulated environment	OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 2.12 Counsel and administer informed consent to patients and their families in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	AS7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity
3/31/2022	Thursday	CM 3.2 Describe concepts of safe and wholesome water, sanitary sources of water, water purification processes, water quality standards, concepts of water conservation and rainwater harvesting	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment	EN 2.10 Identify and describe the use of common instruments used in ENT surgery	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	IM 2.9 Distinguish and differentiate between stable and unstable angina and AMI based on the clinical presentation	DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU	DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions
4/1/2022	Friday	CM 6.4 Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods, frequency distribution,	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN 2.14 Demonstrate the correct technique to instilling topical medications into the ear, nose and throat in a simulated	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic	DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	AS7.4 Observe and describe the basic setup process of a ventilator	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco smoking, alcohol and

		measures of central tendency and dispersion		environment	recognition and management of fat embolism as a complication	stroke			,smoking,alcohol and other causative factors.
4/2/2022	Saturday	CM 7.4 Define, calculate and interpret morbidity and mortality indicators based on given set of data	OP7.5 - To participate in the team for cataract surgery	EN 3.1 Observe and describe the indications for and steps involved in the performance of Otomicroscopic examination in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	PE 27.15 Assess airway and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting	DR12.5 Define erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment	AS7.5 Observe and describe the principles of monitoring in an ICU	DE 4.3Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
4/3/2022	Sunday	Holiday							
4/4/2022	Monday	CM 7.9 Describe and demonstrate the application of computers in epidemiology	OP7.6 - Administer informed consent and counsel patients for cataract surgery in a simulated environment	EN 2.13 Identify, resuscitate and manage ENT emergencies in a simulated environment (including tracheostomy, anterior nasal packing, removal of foreign bodies in ear, nose, throat and upper respiratory tract)	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	PE 27.23 Assess for signs of severe dehydration	DR12.6 Identify and distinguish exfoliative dermatitis from other skin lesions	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning	DE 4.3Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
4/5/2022	Tuesday	CM 7.7 Describe and demonstrate the steps in the Investigation of an epidemic of communicable disease and describe the principles of control measures	OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Uniuocular & Binocular)	EN 3.2 Observe and describe the indications for and steps involved in the performance of diagnostic nasal Endoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam
4/6/2022	Wednesday	CM 8.6 Educate and train health workers in disease surveillance, control & treatment and health education	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 3.3 Observe and describe the indications for and steps involved in the performance of Rigid/Flexible Laryngoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR3.2 Demonstrate the grattage test	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3Demonstrate and document an appropriate clinical examination in a patient undergoing
		CM3.3 Describe the		EN 3.4 Observe and	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features,		SU4.2 Describe Clinical	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of

4/7/2022	Thursday	Describe the aetiology and basis of water borne diseases /jaundice/hepatitis/ diarrheal diseases	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	describe the indications for and steps involved in the removal of foreign bodies from ear, nose & throat	Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	features, Diagnose type and extent of burns and plan appropriate treatment.	common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.	general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants	
4/8/2022	Friday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epilation	EN 3.5 Observe and describe the indications for and steps involved in the surgical procedures in ear, nose & throat EN 4.24 Enumerate the indications observe and describe the steps in a Septoplasty	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	SU17.1 Describe the Principles of FIRST AID	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene,diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	
4/9/2022	Saturday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 4.40 Observe and describe the indications for and steps involved in tonsillectomy / adenoidectomy EN 4.10 Observe and describe the indications for and steps involved in myringotomy and myringoplasty EN 4.11 Enumerate the indications describe the	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	
4/10/2022	Sunday	Holiday								
4/11/2022	Monday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 3.6 Observe and describe the indications for and steps involved in the skills of emergency procedures in ear, nose & throat	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	SU17.3 Describe the Principles in management of mass casualties K KH Y Lecture, Small group discussion & SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health	ASS.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks ASS.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anesthesia	
4/12/2022	Tuesday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN4.50 Observe and describe the indications for and steps involved in Tracheostomy EN4.51 Observe and describe the care of the patient with a tracheostomy	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.2 Identify spirochete in a dark ground microscopy	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management &OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics,health.	ASS.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children ASS.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	

BATCHES		C	D	E	F	A1&A2	A2&A1	B1 & B2	B2 & B1
4/20/2022	Wednesday	CM 5.6 Enumerate and discuss the National Nutrition Policy, important national nutritional Programs including the Integrated Child Development Services Scheme (ICDS) etc	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes etc	EN 2.1 Elicit document and present an appropriate history in a patient presenting with an ENT complaint	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DR3.2 Demonstrate the grantage test	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3 Demonstrate and document an appropriate clinical examination in a patient undergoing	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries
4/21/2022	Thursday	CM 20.1 List important public health events of last five years	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 2.2 Demonstrate the correct use of a headlamp in the examination of the ear, nose and throat EN 2.3 Demonstrate the correct technique of examination of the ear including Otoscopy EN 4.4 Demonstrate the correct technique to hold visualize and assess the mobility of the tympanic	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.
4/22/2022	Friday	CM 19.2 Describe roles of essential medicine in primary health care	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatic cilia removal by epilation	EN 2.5 Demonstrate the correct technique of examination of the nose & paranasal sinuses including the use of nasal speculum Examination of oral cavity, Throat and Larynx	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.1 Describe the Principles of FIRST AID	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene
4/23/2022	Saturday	CM 12.3 Describe the prevention of health problems of aged population	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 2.6 Demonstrate the correct technique of examining the throat including the use of a tongue depressor EN 2.7 Demonstrate the correct technique of examination of neck including elicitation of laryngeal crepitus EN 2.11 Describe and identify by clinical	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.
4/24/2022	Sunday	Holiday							
		CM 13.1 Demonstrate ability to use local	OP3.2 - Demonstrate document and present the	EN 2.8 Demonstrate the	OR 2.6 Describe and discuss the aetiopathogenesis,	SU17.3 Describe the	DR9.3 Enumerate the	AS5.3 Observe and describe the principles and steps/ techniques	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the

4/25/2022	Monday	resources whenever required like in mass disaster situations & Define and describe the concept of Disaster management	correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	correct technique to perform and interpret pure tone audiogram & impedance audiogram	mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	Principles in management of mass casualties K KH Y Lecture, Small group discussion	indications and observe the performance of a slit skin smear in patients with leprosy	involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anesthesia	edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health
4/26/2022	Tuesday	CM 4.3 Demonstrate and describe the steps in evaluation of health promotion and education program	OP4.8 - Demonstrate technique of removal of foreign body in the cornea in a simulated environment	EN 4.16 Observe and describe the indications for and steps involved in the performance of pure tone audiometry EN4.17 Enumerate the indications and interpret the results of an audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DR10.2 Identify spirochete in a dark ground microscopy	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics, health.
4/27/2022	Wednesday	CM 10.6 Counsel in a simulated environment, contraception and puerperal sterilisation & Enumerate and describe various family planning methods, their advantages and shortcomings	OP4.10 - Counsel patients and family about eye donation in a simulated environment	EN 2.9 Choose correctly and interpret radiological, microbiological & histological investigations relevant to the ENT disorders	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.
4/28/2022	Thursday	CM 1.9 Demonstrate the role of effective Communication skills in health in a simulated environment	OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 2.12 Counsel and administer informed consent to patients and their families in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	AS7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity
4/29/2022	Friday	CM 3.2 Describe concepts of safe and wholesome water, sanitary sources of water, water purification processes, water quality standards, concepts of water conservation and rainwater harvesting	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment	EN 2.10 Identify and describe the use of common instruments used in ENT surgery	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	IM 2.9 Distinguish and differentiate between stable and unstable angina and AMI based on the clinical presentation	DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU AS7.4 Observe and describe the basic setup process of a ventilator	DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions

4/30/2022	Saturday	CM 6.4 Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods, frequency distribution, measures of central tendency and dispersion	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN 2.14 Demonstrate the correct technique to instilling topical medications into the ear, nose and throat in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic stroke	DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.	
5/1/2022	Sunday	Holiday								
5/2/2022	Monday	CM 7.4 Define, calculate and interpret morbidity and mortality indicators based on given set of data	OP7.5 - To participate in the team for cataract surgery	EN 3.1 Observe and describe the indications for and steps involved in the performance of Otomicroscopic examination in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	PE 27.15 Assess airway and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting & PE 27.23 Assess for signs of severe dehydration	DR12.5 Define erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.	
5/3/2022	Tuesday	Eid - UI - Fitar								
5/4/2022	Wednesday	CM 7.9 Describe and demonstrate the application of computers in epidemiology	OP7.6 - Administer informed consent and counsel patients for cataract surgery in a simulated environment	EN 2.13 Identify, resuscitate and manage ENT emergencies in a simulated environment (including tracheostomy, anterior nasal packing, removal of foreign bodies in ear, nose, throat and upper respiratory tract)	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam	
5/5/2022	Thursday	CM 7.7 Describe and demonstrate the steps in the Investigation of an epidemic of communicable disease and describe the principles of control measures	OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Unicocular & Binocular)	EN 3.2 Observe and describe the indications for and steps involved in the performance of diagnostic nasal Endoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR3.2 Demonstrate the grattage test	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3 Demonstrate and document an appropriate clinical examination in a patient undergoing	
		CM 8.6 Educate and train	OP1.3 - Demonstrate the steps in performing the	EN 3.3 Observe and describe the indications	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features,		SU4.2 Describe Clinical	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of	

5/6/2022	Friday	health workers in disease surveillance, control & treatment and health education	visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	for and steps involved in the performance of Rigid/Flexible Laryngoscopy	Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	features, Diagnose type and extent of burns and plan appropriate treatment.	common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.	general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants	
5/7/2022	Saturday	CM3.3 Describe the aetiology and basis of water borne diseases /jaundice/hepatitis/ diarrheal diseases	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 3.4 Observe and describe the indications for and steps involved in the removal of foreign bodies from ear, nose & throat	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	SU17.1 Describe the Principles of FIRST AID	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	
5/8/2022	Sunday	Holiday								
5/9/2022	Monday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatic cilia removal by epilation	EN 3.5 Observe and describe the indications for and steps involved in the surgical procedures in ear, nose & throat EN 4.24 Enumerate the indications observe and describe the steps in a Septoplasty	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	
5/10/2022	Tuesday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 4.40 Observe and describe the indications for and steps involved in tonsillectomy / adenoidectomy EN 4.10 Observe and describe the indications for and steps involved in myringotomy and myringoplasty EN 4.11 Enumerate the indications describe the	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	SU17.3 Describe the Principles in management of mass casualties K KH Y Lecture, Small group discussion	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health	ASS.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks ASS.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anesthesia	
5/11/2022	Wednesday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 3.6 Observe and describe the indications for and steps involved in the skills of emergency procedures in ear, nose & throat	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR10.2 Identify spirochete in a dark ground microscopy	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics, health.	ASS.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children ASS.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	

5/12/2022	Thursday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN4.50 Observe and describe the indications for and steps involved in Tracheostomy EN4.51 Observe and describe the care of the patient with a tracheostomy	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	
5/13/2022	Friday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.5 - To participate in the team for cataract surgery	EN 4.1 Elicit document and present a correct history, demonstrate and describe the clinical features, choose the correct investigations and describe the principles of management of Otaglia	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity	AS7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	
5/14/2022	Saturday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP4.10 - Counsel patients and family about eye donation in a simulated environment OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 4.6 Elicit, document and present a correct history, demonstrate and describe the correct investigations and describe the principles of management of Discharging ear	OR 13.2 Participate as a member in team for Resuscitation of Polytrauma victim by doing all of the following : (a) I.V. access central - peripheral (b) Bladder catheterization (c) Endotracheal intubation (d) Splintage	DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	IM 2.9 Distinguish and differentiate between stable and unstable angina and AMI based on the clinical presentation	DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU AS7.4 Observe and describe the basic setup process of a ventilator	
5/15/2022	Sunday	Holiday								
5/16/2022	Monday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment ,OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Unicocular & Binocular)	EN 4.9 Demonstrate the correct technique for syringing wax from the ear in a simulated environment	OR 14.1 Demonstrate the ability to counsel patients regarding prognosis in patients with various orthopedic illnesses like a. fractures with disabilities b. fractures that require prolonged bed stay c. bone tumours d. congenital disabilities	DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic stroke	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning	
5/17/2022	Tuesday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment ,OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Unicocular & Binocular)	EN 4.9 Demonstrate the correct technique for syringing wax from the ear in a simulated environment	OR 14.1 Demonstrate the ability to counsel patients regarding prognosis in patients with various orthopedic illnesses like a. fractures with disabilities b. fractures that require prolonged bed stay	DR12.5 Define erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment	PE 27.15 Assess airway and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting & PE	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco smoking,alcohol and	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy	

		problems	correct technique to examine extra ocular movements (Unilateral & Binocular)	environment	prolonged bed stay c. bone tumours d. congenital disabilities	treatment	27.23 Assess for signs of severe dehydration	,smoking,alcohol and other causative factors.	in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning

BATCHES		D	E	F	A	B1&B2	B2&B1	C1 & C2	C2 & C1
5/19/2022	Thursday	CM 5.6 Enumerate and discuss the National Nutrition Policy, important national nutritional Programs including the Integrated Child Development Services Scheme (ICDS) etc	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 2.1 Elicit document and present an appropriate history in a patient presenting with an ENT complaint	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DR3.2 Demonstrate the grattage test	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3 Demonstrate and document an appropriate clinical examination in a patient undergoing	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries
5/20/2022	Friday	CM 20.1 List important public health events of last five years	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 2.2 Demonstrate the correct use of a headlamp in the examination of the ear, nose and throat EN 2.3 Demonstrate the correct technique of examination of the ear including Otoscopy EN 4.4 Demonstrate the correct technique to hold visualize and assess the mobility of the tympanic	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.
5/21/2022	Saturday	CM 19.2 Describe roles of essential medicine in primary health care	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epilation	EN 2.5 Demonstrate the correct technique of examination of the nose & paranasal sinuses including the use of nasal speculum Examination of oral cavity, Throat and Larynx	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.1 Describe the Principles of FIRST AID	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene
5/22/2022	Sunday	Holiday							
5/23/2022	Monday	CM 12.3 Describe the prevention of health problems of aged population	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including	EN 2.6 Demonstrate the correct technique of examining the throat including the use of a tongue depressor EN 2.7 Demonstrate the correct technique of examination of neck	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of

			Congestion, discharge, pain	including elicitation of laryngeal crepitus EN 2.11 Describe and identify by clinical	of clavicle			techniques involved in anaesthesia outside the operating room	above.
5/24/2022	Tuesday	CM 13.1 Demonstrate ability to use local resources whenever required like in mass disaster situations & Define and describe the concept of Disaster management	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 2.8 Demonstrate the correct technique to perform and interpret pure tone audiogram & impedance audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.3 Describe the Principles in management of mass casualties K KH Y Lecture, Small group discussion	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	AS5.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anaesthesia	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health
5/25/2022	Wednesday	CM 4.3 Demonstrate and describe the steps in evaluation of health promotion and education program	OP4.8 - Demonstrate technique of removal of foreign body in the cornea in a simulated environment	EN 4.16 Observe and describe the indications for and steps involved in the performance of pure tone audiometry EN4.17 Enumerate the indications and interpret the results of an audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DR10.2 Identify spirochete in a dark ground microscopy	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics, health.
5/26/2022	Thursday	CM 10.6 Counsel in a simulated environment, contraception and puerperal sterilisation & Enumerate and describe various family planning methods, their advantages and shortcomings	OP4.10 - Counsel patients and family about eye donation in a simulated environment	EN 2.9 Choose correctly and interpret radiological, microbiological & histological investigations relevant to the ENT disorders	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.
5/27/2022	Friday	CM 1.9 Demonstrate the role of effective Communication skills in health in a simulated environment	OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 2.12 Counsel and administer informed consent to patients and their families in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	AS7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity
		CM 3.2 Describe concepts of safe and wholesome	OP6.10 - Counsel patients with conditions of the iris		discuss the aetiopathogenesis, clinical features, investigations and	IM 2.9 Distinguish and	DR11.2 Identify and distinguish the		DE 4.2 Discuss the role of

5/28/2022	Saturday	water, sanitary sources of water, water purification processes, water quality standards, concepts of water conservation and rainwater harvesting	and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment	EN 2.10 Identify and describe the use of common instruments used in ENT surgery	principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	differentiate between stable and unstable angina and AMI based on the clinical presentation	dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU	etiological factors in the formation of precancerous /cancerous lesions
5/29/2022	Sunday	Holiday							
5/30/2022	Monday	CM 6.4 Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods, frequency distribution, measures of central tendency and dispersion	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN 2.14 Demonstrate the correct technique to instilling topical medications into the ear, nose and throat in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic stroke	DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	AS7.4 Observe and describe the basic setup process of a ventilator	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
5/31/2022	Tuesday	CM 7.4 Define, calculate and interpret morbidity and mortality indicators based on given set of data	OP7.5 - To participate in the team for cataract surgery	EN 3.1 Observe and describe the indications for and steps involved in the performance of Otomicroscopic examination in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	PE 27.15 Assess airway and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting	DR12.5 Define erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment	AS7.5 Observe and describe the principles of monitoring in an ICU	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
6/1/2022	Wednesday	CM 7.9 Describe and demonstrate the application of computers in epidemiology	OP7.6 - Administer informed consent and counsel patients for cataract surgery in a simulated environment	EN 2.13 Identify, resuscitate and manage ENT emergencies in a simulated environment (including tracheostomy, anterior nasal packing, removal of foreign bodies in ear, nose, throat and upper respiratory tract)	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	PE 27.23 Assess for signs of severe dehydration	DR12.6 Identify and distinguish exfoliative dermatitis from other skin lesions	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
6/2/2022	Thursday	CM 7.7 Describe and demonstrate the steps in the investigation of an epidemic of communicable disease and describe the principles of control measures	OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Unilateral & Binocular)	EN 3.2 Observe and describe the indications for and steps involved in the performance of diagnostic nasal Endoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam

6/3/2022	Friday	CM 8.6 Educate and train health workers in disease surveillance, control & treatment and health education	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 3.3 Observe and describe the indications for and steps involved in the performance of Rigid/Flexible Laryngoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR3.2 Demonstrate the grattage test	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3 Demonstrate and document an appropriate clinical examination in a patient undergoing	
6/4/2022	Saturday	CM3.3 Describe the aetiology and basis of water borne diseases /jaundice/hepatitis/ diarrheal diseases	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 3.4 Observe and describe the indications for and steps involved in the removal of foreign bodies from ear, nose & throat	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants.	
6/5/2022	Sunday	Holiday								
6/6/2022	Monday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epililation	EN 3.5 Observe and describe the indications for and steps involved in the surgical procedures in ear, nose & throat EN 4.24 Enumerate the indications observe and describe the steps in a Septoplasty	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	SU17.1 Describe the Principles of FIRST AID	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	
6/7/2022	Tuesday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 4.40 Observe and describe the indications for and steps involved in tonsillectomy / adenoidectomy EN 4.10 Observe and describe the indications for and steps involved in myringotomy and myringoplasty EN 4.11 Enumerate the indications describe the	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	
6/8/2022	Wednesday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal	EN 3.6 Observe and describe the indications for and steps involved in the skills of emergency procedures in ear, nose &	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with	SU17.3 Describe the Principles in management of mass casualties K KH Y Lecture, Small group discussion	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/	AS5.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct	

			lustre, pupil abnormality, ciliary tenderness	throat	(Cervical Spondylosis, Lumbar Spondylosis, PID)	leprosy		restoring missing teeth/ tissue with respect to the benefits on oral and systemic health	use of commonly used drugs and adjuvant agents in regional anesthesia	
6/9/2022	Thursday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN4.50 Observe and describe the indications for and steps involved in Tracheostomy EN4.51 Observe and describe the care of the patient with a tracheostomy	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.2 Identify spirochete in a dark ground microscopy	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics,health.	ASS.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children ASS.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	
6/10/2022	Friday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.5 - To participate in the team for cataract surgery	EN 4.1 Elicit document and present a correct history, demonstrate and describe the clinical features, choose the correct investigations and describe the principles of management of Otaglia	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocction and the role it might have on oral health specifically on the TMJ.	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	
6/11/2022	Saturday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP4.10 - Counsel patients and family about eye donation in a simulated environment OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 4.6 Elicit, document and present a correct history, demonstrate and describe the correct investigations and describe the principles of management of Discharging ear	OR 13.2 Participate as a member in team for Resuscitation of Polytrauma victim by doing all of the following : (a) I.V. access central - peripheral (b) Bladder catheterization (c) Endotracheal intubation (d) Splintage	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity	AS 7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	
6/12/2022	Sunday	Holiday								
6/13/2022	Monday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment ,OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Uniuocular & Binocular)	EN 4.9 Demonstrate the correct technique for syringing wax from the ear in a simulated environment	OR 13.2 Participate as a member in team for Resuscitation of Polytrauma victim by doing all of the following : (a) I.V. access central - peripheral (b) Bladder catheterization (c) Endotracheal intubation (d) Splintage	DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	IM 2.9 Distinguish and differentiate between stable and unstable angina and AMI based on the clinical presentation	DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU AS7.4 Observe and describe the basic setup process of a ventilator

6/17/2022	Friday	CM 5.6 Enumerate and discuss the National Nutrition Policy, important national nutritional Programs including the Integrated Child Development Services Scheme (ICDS) etc	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 2.1 Elicit document and present an appropriate history in a patient presenting with an ENT complaint	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DR3.2 Demonstrate the grattage test	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3Demonstrate and document an appropriate clinical examination in a patient undergoing	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries
6/18/2022	Saturday	CM 20.1 List important public health events of last five years	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 2.2 Demonstrate the correct use of a headlamp in the examination of the ear, nose and throat EN 2.3 Demonstrate the correct technique of examination of the ear including Otoscopy EN 4.4 Demonstrate the correct technique to hold visualize and assess the mobility of the tympanic	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DR8.2Identify and distinguish herpes simplex and herpes labialis from other skin lesions	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants.	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.
6/19/2022	Sunday	Holiday							
			OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells	EN 2.5 Demonstrate the correct technique of examination of the nose &	OR 2.1 Describe and discuss the mechanism of			AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with

6/20/2022	Monday	CM 19.2 Describe roles of essential medicine in primary health care	phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epilaton	paranasal sinuses including the use of nasal speculum Examination of oral cavity, Throat and Larynx	Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.1 Describe the Principles of FIRST AID	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	oral hygiene,diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene
6/21/2022	Tuesday	CM 12.3 Describe the prevention of health problems of aged population	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 2.6 Demonstrate the correct technique of examining the throat including the use of a tongue depressor EN 2.7 Demonstrate the correct technique of examination of neck including elicitation of laryngeal crepitus EN 2.11 Describe and identify by clinical	OR 2.1 Describe and discuss the mechanism of injury, clinical features, investigations and plan management of fracture of clavicle	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.
6/22/2022	Wednesday	CM 13.1 Demonstrate ability to use local resources whenever required like in mass disaster situations & Define and describe the concept of Disaster management	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 2.8 Demonstrate the correct technique to perform and interpret pure tone audiogram & impedance audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.3 Describe the Principles in management of mass casualties K K H Y Lecture, Small group discussion	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	AS5.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anaesthesia	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health
6/23/2022	Thursday	CM 4.3 Demonstrate and describe the steps in evaluation of health promotion and education program	OP4.8 - Demonstrate technique of removal of foreign body in the cornea in a simulated environment	EN 4.16 Observe and describe the indications for and steps involved in the performance of pure tone audiometry EN4.17 Enumerate the indications and interpret the results of an audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DR10.2 Identify spirochete in a dark ground microscopy	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics,health.
6/24/2022	Friday	CM 10.6 Counsel in a simulated environment, contraception and puerperal sterilisation & Enumerate and describe various family planning methods, their advantages and shortcomings	OP4.10 - Counsel patients and family about eye donation in a simulated environment	EN 2.9 Choose correctly and interpret radiological, microbiological & histological investigations relevant to the ENT disorders	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.

6/25/2022	Saturday	CM 1.9 Demonstrate the role of effective Communication skills in health in a simulated environment	OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 2.12 Counsel and administer informed consent to patients and their families in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	AS7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity
6/26/2022	Sunday	Holiday							
6/27/2022	Monday	CM 3.2 Describe concepts of safe and wholesome water, sanitary sources of water, water purification processes, water quality standards, concepts of water conservation and rainwater harvesting	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment	EN 2.10 Identify and describe the use of common instruments used in ENT surgery	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	IM 2.9 Distinguish and differentiate between stable and unstable angina and AMI based on the clinical presentation	DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU	DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions
6/28/2022	Tuesday	CM 6.4 Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods, frequency distribution, measures of central tendency and dispersion	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN 2.14 Demonstrate the correct technique to instilling topical medications into the ear, nose and throat in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic stroke	DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	AS7.4 Observe and describe the basic setup process of a ventilator	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
6/29/2022	Wednesday	CM 7.4 Define, calculate and interpret morbidity and mortality indicators based on given set of data	OP7.5 - To participate in the team for cataract surgery	EN 3.1 Observe and describe the indications for and steps involved in the performance of Otomicroscopic examination in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	PE 27.15 Assess airway and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting	DR12.5 Define erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment	AS7.5 Observe and describe the principles of monitoring in an ICU	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
6/30/2022	Thursday	CM 7.9 Describe and demonstrate the application of computers in epidemiology	OP7.6 - Administer informed consent and counsel patients for cataract surgery in a simulated environment	EN 2.13 Identify, resuscitate and manage ENT emergencies in a simulated environment (including tracheostomy, anterior nasal packing, removal of foreign bodies)	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones	PE 27.23 Assess for signs of severe dehydration	DR12.6 Identify and distinguish exfoliative dermatitis from other skin lesions	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and

			simulated environment	removal of foreign bodies in ear, nose, throat and upper respiratory tract)	(a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot			in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning	, smoking, alcohol and other causative factors.	
7/1/2022	Friday	CM 7.7 Describe and demonstrate the steps in the Investigation of an epidemic of communicable disease and describe the principles of control measures	OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Uniocular & Binocular)	EN 3.2 Observe and describe the indications for and steps involved in the performance of diagnostic nasal Endoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam	
7/2/2022	Saturday	CM 8.6 Educate and train health workers in disease surveillance, control & treatment and health education	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 3.3 Observe and describe the indications for and steps involved in the performance of Rigid/Flexible Laryngoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR3.2 Demonstrate the grattage test	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3 Demonstrate and document an appropriate clinical examination in a patient undergoing	
7/3/2022	Sunday	Holiday								
7/4/2022	Monday	CM3.3 Describe the aetiology and basis of water borne diseases /jaundice/hepatitis/ diarrheal diseases	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 3.4 Observe and describe the indications for and steps involved in the removal of foreign bodies from ear, nose & throat	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants.	
7/5/2022	Tuesday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epilation	EN 3.5 Observe and describe the indications for and steps involved in the surgical procedures in ear, nose & throat EN 4.24 Enumerate the indications observe and describe the steps in a Septoplasty	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	SU17.1 Describe the Principles of FIRST AID	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	
			OP3.1 - Elicit document and present an	EN 4.40 Observe and describe the indications for and steps involved in tonsillectomy /	OR 6.1 Describe and discuss the clinical features, investigations		SU17.2 Demonstrate the	DE 2.1 Discuss the various causes for partial/	AS4.6 Observe and describe the principles and the steps/ techniques	

7/6/2022	Wednesday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	adenoidectomy EN 4.10 Observe and describe the indications for and steps involved in myringotomy and myringoplasty EN 4.11 Enumerate the indications describe the	and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	steps in Basic Life Support. Transport of injured patient in a simulated environment	complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.	involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	
7/7/2022	Thursday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 3.6 Observe and describe the indications for and steps involved in the skills of emergency procedures in ear, nose & throat	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	SU17.3 Describe the Principles in management of mass casualties K K H Y Lecture, Small group discussion	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health	AS5.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anesthesia	
7/8/2022	Friday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN4.50 Observe and describe the indications for and steps involved in Tracheostomy EN4.51 Observe and describe the care of the patient with a tracheostomy	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.2 Identify spirochete in a dark ground microscopy	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics, health.	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	
7/9/2022	Saturday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.5 - To participate in the team for cataract surgery	EN 4.1 Elicit document and present a correct history, demonstrate and describe the clinical features, choose the correct investigations and describe the principles of management of Otagia	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	
7/10/2022	Sunday	Holiday								
7/11/2022	Monday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP4.10 - Counsel patients and family about eye donation in a simulated environment OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 4.6 Elicit, document and present a correct history, demonstrate and describe the correct investigations and describe the principles of management of Discharging ear	OR 13.2 Participate as a member in team for Resuscitation of Polytrauma victim by doing all of the following : (a) I.V. access central - peripheral (b) Bladder catheterization (c) Endotracheal intubation (d) Splintage	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity	AS7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	

7/12/2022	Tuesday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment ,OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Uniuocular & Binocular)	EN 4.9 Demonstrate the correct technique for syringing wax from the ear in a simulated environment	OR 13.2 Participate as a member in team for Resuscitation of Polytrauma victim by doing all of the following : (a) I.V. access central - peripheral (b) Bladder catheterization (c) Endotracheal intubation (d) Splintage	DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	IM 2.9 Distinguish and differentiate between stable and unstable angina and AMI based on the clinical presentation	DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU AS7.4 Observe and describe the basic setup process of a ventilator
7/13/2022	Wednesday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment	EN 4.9 Demonstrate the correct technique for syringing wax from the ear in a simulated environment	OR 14.1 Demonstrate the ability to counsel patients regarding prognosis in patients with various orthopedic illnesses like a. fractures with disabilities b. fractures that require prolonged bed stay c. bone tumours d. congenital disabilities	DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic stroke	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning
7/14/2022	Thursday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Uniuocular & Binocular)	EN 4.9 Demonstrate the correct technique for syringing wax from the ear in a simulated environment	OR 14.1 Demonstrate the ability to counsel patients regarding prognosis in patients with various orthopedic illnesses like a. fractures with disabilities b. fractures that require prolonged bed stay c. bone tumours d. congenital disabilities	DR12.5 Define erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment	PE 27.15 Assess airway and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting & PE 27.23 Assess for signs of severe dehydration	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning

BATCHES		F	A	B	C	D1&D2	D2&D1	E1 & E2	E2 & E1
7/16/2022	Saturday	CM 5.6 Enumerate and discuss the National Nutrition Policy, important national nutritional Programs including the Integrated Child Development Services Scheme (ICDS) etc	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 2.1 Elicit document and present an appropriate history in a patient presenting with an ENT complaint	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DR3.2 Demonstrate the grattage test	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3 Demonstrate and document an appropriate clinical examination in a patient undergoing	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries

7/17/2022	Sunday	Holiday							
7/18/2022	Monday	CM 20.1 List important public health events of last five years	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 2.2 Demonstrate the correct use of a headlamp in the examination of the ear, nose and throat EN 2.3 Demonstrate the correct technique of examination of the ear including Otoscopy EN 4.4 Demonstrate the correct technique to hold visualize and assess the mobility of the tympanic	OR 1.1 Describe and discuss the Principles of pre-hospital care and Casualty management of a trauma victim including principles of triage	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants)	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.
7/19/2022	Tuesday	CM 19.2 Describe roles of essential medicine in primary health care	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epilaton	EN 2.5 Demonstrate the correct technique of examination of the nose & paranasal sinuses including the use of nasal speculum Examination of oral cavity, Throat and Larynx	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.1 Describe the Principles of FIRST AID	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene, diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene
7/20/2022	Wednesday	CM 12.3 Describe the prevention of health problems of aged population	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 2.6 Demonstrate the correct technique of examining the throat including the use of a tongue depressor EN 2.7 Demonstrate the correct technique of examination of neck including elicitation of laryngeal crepitus EN 2.11 Describe and identify by clinical	OR 2.1 Describe and discuss the mechanism of Injury, clinical features, investigations and plan management of fracture of clavicle	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.
7/21/2022	Thursday	CM 13.1 Demonstrate ability to use local resources whenever required like in mass disaster situations & Define and describe the concept of Disaster management	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 2.8 Demonstrate the correct technique to perform and interpret pure tone audiogram & impedance audiogram	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	SU17.3 Describe the Principles in management of mass casualties K KH Y Lecture, Small group discussion	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	AS5.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anesthesia	DE 2.3 Identify complete compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health
7/22/2022	Friday	CM 4.3 Demonstrate and describe the steps in evaluation of health promotion and education	OP4.8 - Demonstrate technique of removal of foreign body in the cornea in a simulated	EN 4.16 Observe and describe the indications for and steps involved in the performance of pure tone audiometry EN4.17 Enumerate the indications	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management	SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	DR10.2 Identify spirochete in a dark ground microscopy	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on

		program	environment	and interpret the results of an audiogram	principles of management of fractures of distal radius			involved in common blocks used in surgery (including brachial plexus blocks)	aesthetics,health.
7/23/2022	Saturday	CM 10.6 Counsel in a simulated environment, contraception and puerperal sterilisation & Enumerate and describe various family planning methods, their advantages and shortcomings	OP4.10 - Counsel patients and family about eye donation in a simulated environment	EN 2.9 Choose correctly and interpret radiological, microbiological & histological investigations relevant to the ENT disorders	OR 2.6 Describe and discuss the aetiopathogenesis, mechanism of injury, clinical features, investigations and principles of management of fractures of distal radius	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management.	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of sexually transmitted disease	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2 Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	DE 3.3 Identify malocclusion. 3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.
7/24/2022	Sunday	Holiday							
7/25/2022	Monday	CM 1.9 Demonstrate the role of effective Communication skills in health in a simulated environment	OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber	EN 2.12 Counsel and administer informed consent to patients and their families in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV)	AS7.1 Visit, enumerate and describe the functions of an Intensive Care Unit	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity
7/26/2022	Tuesday	CM 3.2 Describe concepts of safe and wholesome water, sanitary sources of water, water purification processes, water quality standards, concepts of water conservation and rainwater harvesting	OP6.10 - Counsel patients with conditions of the iris and anterior chamber about their diagnosis, therapy and prognosis in an empathetic manner in a simulated environment	EN 2.10 Identify and describe the use of common instruments used in ENT surgery	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	IM 2.9 Distinguish and differentiate between stable and unstable angina and AMI based on the clinical presentation	DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU	DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions
7/27/2022	Wednesday	CM 6.4 Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods, frequency distribution, measures of central tendency and dispersion	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN 2.14 Demonstrate the correct technique to instilling topical medications into the ear, nose and throat in a simulated environment	discuss the aetiopathogenesis, clinical features, investigations and principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic stroke	DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	AS7.4 Observe and describe the basic setup process of a ventilator	DE 4.3 Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
				EN 3.1 Observe and describe the indications	discuss the aetiopathogenesis, clinical features, investigations and	PE 27.15 Assess airway	DR12.5 Define		DE 4.3 Identify potential precancerous /cancerous lesions.

7/28/2022	Thursday	CM 7.4 Define, calculate and interpret morbidity and mortality indicators based on given set of data	OP7.5 - To participate in the team for cataract surgery	for and steps involved in the performance of Otic/microscopic examination in a simulated environment	principles of management of Fracture shaft of femur in all age groups and the recognition and management of fat embolism as a complication	and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting	erythroderma. Enumerate and identify the causes of erythroderma. Discuss the treatment	AS7.5 Observe and describe the principles of monitoring in an ICU	4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
7/29/2022	Friday	CM 7.9 Describe and demonstrate the application of computers in epidemiology	OP7.6 - Administer informed consent and counsel patients for cataract surgery in a simulated environment	EN 2.13 Identify, resuscitate and manage ENT emergencies in a simulated environment (including tracheostomy, anterior nasal packing, removal of foreign bodies in ear, nose, throat and upper respiratory tract)	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	PE 27.23 Assess for signs of severe dehydration	DR 12.6 Identify and distinguish exfoliative dermatitis from other skin lesions	AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy in the preoperative period AS10.1 Enumerate the hazards of incorrect patient positioning	DE 4.3Identify potential precancerous /cancerous lesions. 4.4 Counsel patients to risks of oral cancer with respect to tobacco ,smoking,alcohol and other causative factors.
7/30/2022	Saturday	CM 7.7 Describe and demonstrate the steps in the Investigation of an epidemic of communicable disease and describe the principles of control measures	OP9.1 - Demonstrate the correct technique to examine extra ocular movements (Uniuocular & Binocular)	EN 3.2 Observe and describe the indications for and steps involved in the performance of diagnostic nasal Endoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	End Posting Exam	End Posting Exam	End Posting Exam	End Posting Exam
7/31/2022	Sunday	Holiday							
8/1/2022	Monday	CM 8.6 Educate and train health workers in disease surveillance, control & treatment and health education	OP1.3 - Demonstrate the steps in performing the visual acuity assessment for distance vision, near vision, colour vision, the pin hole test and the menace and blink reflexes	EN 3.3 Observe and describe the indications for and steps involved in the performance of Rigid/Flexible Laryngoscopy	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR3.2 Demonstrate the grattage test	SU2.2 Describe the clinical features of shock and its appropriate treatment.	DE 1.1 Enumerate the parts of the tooth. 1.2 Discuss the role of causative microorganisms in the etiopathogenesis of dental caries 1.3 Identify dental caries	AS3.2 Elicit, present and document an appropriate history including medication history in a patient undergoing Surgery as it pertains to a preoperative anaesthetic evaluation AS3.3Demonstrate and document an appropriate clinical examination in a patient undergoing
8/2/2022	Tuesday	CM3.3 Describe the aetiology and basis of water borne diseases /jaundice/hepatitis/ diarrheal diseases	OP2.2 - Demonstrate the symptoms & clinical signs of conditions enumerated in OP2.1	EN 3.4 Observe and describe the indications for and steps involved in the removal of foreign bodies from ear, nose & throat	OR 2.13 Describe and discuss the aetiopathogenesis, clinical features, Investigation and principles of management of: (a) Fracture both bones leg (b) Calcaneus (c) Small bones of foot	DR8.2 Identify and distinguish herpes simplex and herpes labialis from other skin lesions	SU4.2 Describe Clinical features, Diagnose type and extent of burns and plan appropriate treatment.	DE 5.1 Enumerate the parts of the tooth and supporting structure 5.2 Enumerate the common diseases that affect the periodontium and identify local and systemic causative factors. 5.3 Identify periodontal diseases.	AS4.1 Describe and discuss the pharmacology of drugs used in induction and maintenance of general anaesthesia (including intravenous and inhalation induction agents, opiate and non-opiate analgesics, depolarising and non depolarising muscle relaxants.

8/3/2022	Wednesday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP2.3 - Demonstrate under supervision clinical procedures performed in the lid including: bells phenomenon, assessment of entropion/ ectropion, perform the regurgitation test of lacrimal sac. massage technique in cong. dacryocystitis, and trichiatric cilia removal by epilation	EN 3.5 Observe and describe the indications for and steps involved in the surgical procedures in ear, nose & throat EN 4.24 Enumerate the indications observe and describe the steps in a Septoplasty	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.3 Identify and distinguish herpes zoster and varicella from other skin lesions	SU17.1 Describe the Principles of FIRST AID	DE 1.4 Discuss the role of dental caries as a focus of sepsis. 1.5 Counsel patients with oral hygiene,diet and the direct bearing on systemic health. 5.4 Discuss the role of periodontal disease as a focus of sepsis 5.5 Counsel patients with respect to oral hygiene	AS4.4 Observe and describe the principles and the steps/ techniques in maintenance of vital organ functions in patients undergoing surgical procedures AS4.5 Observe and describe the principles and the steps/ techniques in monitoring patients during anaesthesia	
8/4/2022	Thursday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.1 - Elicit document and present an appropriate history in a patient presenting with a "red eye" including congestion, discharge, pain	EN 4.40 Observe and describe the indications for and steps involved in tonsillectomy / adenoidectomy EN 4.10 Observe and describe the indications for and steps involved in myringotomy and myringoplasty EN 4.11 Enumerate the indications describe the	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR8.6 Enumerate the indications, describe the procedure and perform a Tzanck smear	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	DE 2.1 Discuss the various causes for partial/ complete loss of teeth and associated structures. 2.2 Discuss the local and systemic sequelae of above.	AS4.6 Observe and describe the principles and the steps/ techniques involved in day care anesthesia AS4.7 Observe and describe the principles and the steps/ techniques involved in anaesthesia outside the operating room	
8/5/2022	Friday	CM 10.5 Integrated Management of Neonatal and Childhood Illness (IMNCI)	OP3.2 - Demonstrate document and present the correct method of examination of a "red eye" including vision assessment, corneal lustre, pupil abnormality, ciliary tenderness	EN 3.6 Observe and describe the indications for and steps involved in the skills of emergency procedures in ear, nose & throat	OR 6.1 Describe and discuss the clinical features, investigations and principles of management of degenerative condition of spine (Cervical Spondylosis, Lumbar Spondylosis, PID)	DR9.3 Enumerate the indications and observe the performance of a slit skin smear in patients with leprosy	SU17.3 Describe the Principles in management of mass casualties K KH Y Lecture, Small group discussion & SU17.5 Describe clinical features for neurological assessment and GCS in head injuries	compliment of teeth and identify missing teeth. 2.4 Enumerate common ways of restoring the edentulous state. 2.5 Counsel patients on the importance of restoring missing teeth/ tissue with respect to the benefits on oral and systemic health	AS5.3 Observe and describe the principles and steps/ techniques involved in peripheral nerve blocks AS5.4 Observe and describe the pharmacology and correct use of commonly used drugs and adjuvant agents in regional anesthesia	
8/6/2022	Saturday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP7.3 - Demonstrate the correct technique of ocular examination in a patient with a cataract	EN4.50 Observe and describe the indications for and steps involved in Tracheostomy EN4.51 Observe and describe the care of the patient with a tracheostomy	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	DR10.2 Identify spirochete in a dark ground microscopy	OG 14.3 Describe and discuss rupture uterus, causes, diagnosis and management &OG 13.3 Observe/ assist in the performance of an artificial rupture of membranes	DE 3.1 Aware of malocclusion and the tissues that cause it. 3.2 Enumerate the impact of malocclusion on aesthetics,health.	AS5.5 Observe and describe the principles and steps/ techniques involved in caudal epidural in adults and children AS5.6 Observe and describe the principles and steps/ techniques involved in common blocks used in surgery (including brachial plexus blocks)	
8/7/2022	Sunday	Holiday								
8/8/2022	Monday	Moharram								
		CM 10.2 Enumerate and		EN 4.1 Elicit document and present a correct history,	OR 13.1 Participate in a team for procedures in patients and demonstrating the ability	DR10.5 Counsel in a non-judgemental and empathetic manner patients on prevention of	IM 2.9 Distinguish and	DE 3.3 Identify malocclusion.	AS6.1 Describe the principles of monitoring and resuscitation in the recovery room AS6.2	

8/9/2022	Tuesday	describe the methods of screening high risk groups and common health problems	OP7.5 - To participate in the team for cataract surgery	demonstrate and describe the clinical features, choose the correct investigations and describe the principles of management of Otaglia	to perform on mannequins / simulated patients in the following: i. Above elbow plaster ii. Below knee plaster iii. Above knee plaster iv. Thomas splint v. splinting for long bone	sexually transmitted disease DR11.2 Identify and distinguish the dermatologic manifestations of HIV, its complications, opportunistic infections and adverse reactions	differentiate between stable and unstable angina and AMI based on the clinical presentation	3.4 Counsel patients with respect to correction of malocclusion and the role it might have on oral health specifically on the TMJ.	Observe and enumerate the contents of the crash cart and describe the equipment used in the recovery room AS6.3 Describe the common complications encountered by patients	
8/10/2022	Wednesday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP4.10 - Counsel patients and family about eye donation in a simulated environment OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber OP6.10 - Counsel patients with conditions of the iris and	EN 4.6 Elicit, document and present a correct history, demonstrate and describe the correct investigations and describe the principles of management of Discharging ear	OR 13.2 Participate as a member in team for Resuscitation of Polytrauma victim by doing all of the following : (a) I.V. access central - peripheral (b) Bladder catheterization (c) Endotracheal intubation (d) Splintage	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV) DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	IM 18.13 Enumerate the indications for and describe the role of anti platelet agents in non hemorrhagic stroke	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions DE 4.3Identify potential precancerous	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy	
8/12/2022	Friday	CM 10.2 Enumerate and describe the methods of screening high risk groups and common health problems	OP4.10 - Counsel patients and family about eye donation in a simulated environment OP6.6 - Identify and demonstrate the clinical features and distinguish and diagnose common clinical conditions affecting the anterior chamber OP6.10 - Counsel patients with conditions of the iris and	EN 4.9 Demonstrate the correct technique for syringing wax from the ear in a simulated environment	OR 14.1 Demonstrate the ability to counsel patients regarding prognosis in patients with various orthopedic illnesses like a. fractures with disabilities b. fractures that require prolonged bed stay c. bone tumours d. congenital disabilities	DR10.7 Identify and differentiate based on the clinical features non-syphilitic sexually transmitted diseases (chancroid, donovanosis and LGV) DR12.2 Identify eczema and differentiate it from lichenification and changes of aging	PE 27.15 Assess airway and breathing: recognise signs of severe respiratory distress. Check for cyanosis, severe chest indrawing, grunting & PE 27.23 Assess for signs of severe dehydration	DE 4.1 Discuss the prevalence of oral cancer and enumerate the common types of cancer that can affect the tissues of the oral cavity DE 4.2 Discuss the role of etiological factors in the formation of precancerous /cancerous lesions DE 4.3Identify potential precancerous	AS7.2 Enumerate and describe the criteria for admission and discharge of a patient to an ICU AS9.1 Establish intravenous access in a simulated environment AS9.2 Establish central venous access in a simulated environment AS9.3 Describe the principles of fluid therapy

BATCHES		A	B	C	D	E1&E2	E2&E1			
9/5/2022	Monday	IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms,	SU4.1 Elicit document and present history in a case of Burns and perform physical examination. Describe Pathophysiology	OG5.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss	PE1.4 Perform Anthropometric measurements, document in growth charts and interpret  PE1.7 Perform	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention	PS10.2 Enumerate, elicit, describe and document clinical features in patients with somatoform, dissociative and conversion disorders PS10.3 Enumerate and			

		immune status, comorbidities, risk factors, exposure through occupation, travel and	of Burns	evidence- based intrapartum	Developmental assessment and interpret	and treatment of a case	describe the indications and interpret laboratory and other tests used in
9/6/2022	Tuesday	IM4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU5.3 Differentiate the various types of wounds, plan and observe management of wounds	OG5.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss evidence- based intrapartum	PE2.2 Assessment of a child with failing to thrive including eliciting an appropriate history and examination PE2.3 Counseling a parent with failing to thrive child	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS10.5 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment PS10.6 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a
9/7/2022	Wednesday	IM4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU5.3 Differentiate the various types of wounds, plan and observe management of wounds	OG5.2 Determine maternal high risk factors and verify immunization status	PE3.3 Assessment of a child with developmental delay - Elicit document and present history PE3.4 Counsel a parent of a child with developmental delay PE3.7 Visit a Child Developmental Unit and	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS12.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosomatic disorders PS12.3 Enumerate and describe the indications and interpret laboratory and other tests of
9/8/2022	Thursday	IM4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU10.3 Observe common surgical procedures and assist in minor surgical procedures; Observe emergency lifesaving surgical procedures	OG6.1 Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principal underlying and interpret pregnancy tests.	PE4.6 Visit to the Child Guidance Clinic PE5.11 Visit to Child Guidance Clinic and observe functioning	CM 5.7 Describe food hygiene	PS12.4 Describe the treatment of PSychosomatic disorders including behavioural, PSychosocial and pharmacologic therapy PS12.6 Enumerate and describe the pharmacologic basis and side effects
9/9/2022	Friday	IM4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU11.3 Demonstrate maintenance of an airway in a mannequin or equivalent	OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors.	PE6.8 Respecting patient privacy and maintaining confidentiality while dealing with adolescence PE6.9 Perform routine Adolescent Health check up including eliciting history, performing examination including SMR (Sexual Maturity Rating), growth	CM 1.5 Describe the application of interventions at various levels of prevention	PS13.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosexual and gender identity disorders PS13.3 Enumerate and describe the indications and interpret laboratory and
9/10/2022	Saturday	IM4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU11.3 Demonstrate maintenance of an airway in a mannequin or equivalent	OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors.	PE7.5 Observe the correct technique of breast feeding and distinguish wrong right from techniques PE7.7 Perform breast examination and identify common problems during lactation such as retracted nipples, cracked nipples, breast engorgement, breast	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS13.5 Demonstrate family education in a patient with PSychosexual and gender identity disorders in a simulated environment PS13.6 Enumerate and describe the pharmacologic basis and side effects of drugs used in

9/11/2022	Sunday	Holiday					
9/12/2022	Monday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	SU14.2 Describe Surgical approaches, incisions and the use of appropriate instruments in Surgery in general	OG8.2 Elicit document and present an obstetric history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history.	PE8.4 Elicit history on the Complementary Feeding habits PE8.5 Counsel and educate mothers on the best practices in Complimentary Feeding	CM 16.4 Describe health planning in India and National policies related to health and health planning	PA14.2 Enumerate, elicit, describe and document clinical feature patients with PSychiatric disorders occurring in childhood and adolescence PS14.4 Demonstrate family education in a patient with PSychiatry disorders
9/13/2022	Tuesday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	OG8.2 Elicit document and present an obstetric history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history.	PE9.4 Elicit document and present an appropriate nutritional history and perform a dietary recall PE9.5 Calculate the age related calorie requirement in Health and Disease and identify gap PE9.6 Assess and classify the nutrition status of infants, children and	CM 6.3, CM 6.4 Describe, discuss and demonstrate the application of elementary statistical methods including test of significance in various study designs & Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods	PS14.5 Enumerate and describe the pharmacologic basis and side effects of drugs used in PSychiatric disorders occurring in childhood and adolescence PS14.6 Enumerate the appropriate conditions for specialist referral in
9/14/2022	Wednesday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being;	PE10.3 Assessment of a patient with SAM and MAM, diagnosis, classification and planning management including hospital and community based intervention, rehabilitation and prevention PE10.4 Identify children	CM 7.4, CM 7.6 Define, calculate and interpret morbidity and mortality indicators based on given set of data & Enumerate and evaluate the need of screening tests	PS15.1 Describe the aetiology and magnitude of mental retardation PS15.2 Describe and discuss intelligence quotient and its measurement PS15.3 Elicit and document a history and clinical examination and choose appropriate investigations
9/15/2022	Thursday	IM 15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU17.10 Demonstrate Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment	OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being;	PE11.3 Assessment of a child with obesity with regard to eliciting history including physical activity, charting and dietary recall PE11.4 Examination including calculation of BMI, measurement of waist hip ratio, identifying external markers like	CM 9.2 Define, calculate and interpret demographic indices including birth rate, death rate, fertility rates	PS16.1 Enumerate and describe common PSychiatric disorders in the elderly including dementia, depression and PSychois PS16.2 Describe the aetiology and magnitude of PSychiatric illness in the elderly
9/16/2022	Friday	IM 15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU17.10 Demonstrate Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment	OG8.4 Describe and demonstrate clinical monitoring of maternal and fetal well-being	PE12.3 Identify the clinical features of dietary deficiency / excess of Vitamin A PE12.4 Diagnose patients with Vitamin A deficiency, classify and plan Management	CM 5.3 Define and describe common nutrition related health disorders (including macro-PEM, Micro-iron, Zn, iodine, Vit. A), their control and management	PS17.1 Enumerate and describe the recognition and clinical presentation of behavior PSychiatric emergencies (Suicide, Deliberate Self Harm, Violent PS17.2 Describe the initial stabilisation and management of PSychiatric emergencies

9/17/2022	Saturday	<p>IM1.15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors</p> <p>Perform, demonstrate and document a physical examination based on</p>	SU22.3 Demonstrate and document the correct clinical examination of thyroid swellings and discuss the differential diagnosis and their management	OG8.4 Describe and demonstrate clinical monitoring of maternal and fetal well-being	<p>PE12.17 Identify the clinical features of Vitamin B complex deficiency</p> <p>PE12.18 Diagnose patients with Vitamin B complex deficiency and plan management</p> <p>PE12.21 Identify the clinical features of Vitamin C deficiency</p>	CM 3.4 Describe the concept of solid waste, human excreta and sewage disposal	<p>indications for modified electroconvulsive therapy</p> <p>PS18.3 Enumerate and describe the principles and role of Psychosocial interventions in Psychiatric illness including Psychotherapy, behavioural therapy and rehabilitation</p>
9/18/2022	Sunday	Holiday					
9/19/2022	Monday	<p>IM1.9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia</p> <p>Generate a differential diagnosis and prioritise based on clinical features</p>	SU22.3 Demonstrate and document the correct clinical examination of thyroid swellings and discuss the differential diagnosis and their management	OG8.8 Enumerate the indications and describe the investigations including the use of ultrasound in the initial assessment and monitoring in pregnancy	<p>PE13.3 Identify the clinical features of dietary deficiency of Iron and make a diagnosis</p> <p>PE13.4 Interpret hemogram and Iron Panel</p> <p>PE13.5 Propose a management plan for Fe deficiency anaemia</p> <p>PE13.9 Identify the clinical features of Iodine</p>	End Posting Exam	End Posting Exam
9/20/2022	Tuesday	<p>IM1.9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia</p> <p>Generate a differential diagnosis and prioritise based on clinical features</p>	SU25.4 Counsel the patient and obtain informed consent for treatment of malignant conditions of the breast	OG8.8 Enumerate the indications and describe the investigations including the use of ultrasound in the initial assessment and monitoring in pregnancy	<p>PE15.3 Calculate the fluid and electrolyte requirement in health</p> <p>PE15.4 Interpret electrolyte report</p> <p>PE15.5 Calculate fluid and electrolyte imbalance</p>	PS10.2 Enumerate, elicit, describe and document clinical features in patients with somatoform, dissociative and conversion disorders	<p>CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case</p> <p>PS10.3 Enumerate and describe the indications and interpret laboratory and other tests used in</p>
9/21/2022	Wednesday	<p>IM1.9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia</p> <p>Generate a differential diagnosis and prioritise based on clinical features</p>	SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a mannequin or equivalent	OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation	<p>PE15.6 Demonstrate the steps of inserting an IV cannula in a model</p> <p>PE15.7 Demonstrate the steps of inserting an interosseous line in a mannequin</p>	PS10.5 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment	<p>CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case</p> <p>PS10.6 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment</p>

PE8.4 Elicit history on the Complementary Feeding habits PE8.5 Counsel and educate mothers on the best practices in Complementary Feeding	CM 16.4 Describe health planning in India and National policies related to health and health planning	PS14.2 Enumerate, elicit, describe and document clinical feature patients with PSychiatric disorders occurring in childhood and adolescence PS14.4 Demonstrate family education in a patient with PSychiatry disorders
#####	Thursday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	OG8.2 Elicit document and present an obstetric history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history.	PE9.4 Elicit document and present an appropriate nutritional history and perform a dietary recall PE9.5 Calculate the age related calorie requirement in Health and Disease and identify gap PE9.6 Assess and classify the nutrition status of infants, children and	CM 6.3, CM 6.4 Describe, discuss and demonstrate the application of elementary statistical methods including test of significance in various study designs & Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods	PS14.5 Enumerate and describe the pharmacologic basis and side effects of drugs used in PSychiatric disorders occurring in childhood and adolescence PS14.6 Enumerate the appropriate conditions for specialist referral in
#####	Friday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination,	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated	OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination	PE10.3 Assessment of a patient with SAM and MAM, diagnosis, classification and planning management including hospital and community based	CM 7.4, CM 7.6 Define, calculate and interpret morbidity and mortality indicators based on given set of data & Enumerate	PS15.1 Describe the aetiology and magnitude of mental retardation PS15.2 Describe and discuss intelligence quotient and its measurement

		including an appropriate abdominal examination	environment	and clinical monitoring of maternal and fetal well-being;	intervention, rehabilitation and prevention	and evaluate the need of screening tests	PS15.3 Elicit and document a history and clinical examination and choose appropriate investigations	
#####	Saturday	IV15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU17.10 Demonstrate Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment	OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being;	PE10.4 Identify children with obesity with regard to eliciting history including physical activity, charting and dietary recall  PE11.3 Assessment of a child with obesity including physical activity, charting and dietary recall  PE11.4 Examination including calculation of BMI, measurement of waist hip ratio, identifying external markers like	CM 9.2 Define, calculate and interpret demographic indices including birth rate, death rate, fertility rates	PS16.1 Enumerate and describe common PSychiatric disorders in the elderly including dementia, depression and PSychosis PS16.2 Describe the aetiology and magnitude of PSychiatric illness in the elderly	
#####	Sunday	Holiday						
#####	Monday	IV15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU17.10 Demonstrate Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment	OG8.4 Describe and demonstrate clinical monitoring of maternal and fetal well-being	PE12.3 Identify the clinical features of dietary deficiency / excess of Vitamin A PE12.4 Diagnose patients with Vitamin A deficiency, classify and plan Management	CM 5.3 Define and describe common nutrition related health disorders (including macro-PEM, Micro-iron, Zn, iodine, Vit. A), their control and management	PS17.1 Enumerate and describe the recognition and clinical presentation of behavior PSychiatric emergencies (Suicide, Deliberate Self Harm, Violent PS17.2 Describe the initial stabilisation and management of PSychiatric emergencies	
#####	Tuesday	IV15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU22.3 Demonstrate and document the correct clinical examination of thyroid swellings and discuss the differential diagnosis and their management	OG8.4 Describe and demonstrate clinical monitoring of maternal and fetal well-being	PE12.17 Identify the clinical features of Vitamin B complex deficiency PE12.18 Diagnose patients with Vitamin B complex deficiency and plan management PE12.21 Identify the clinical features of Vitamin C deficiency	CM 3.4 Describe the concept of solid waste, human excreta and sewage disposal	PS18.3 Enumerate and describe the principles and role of PSychosocial interventions in PSychiatric illness including PSychotherapy, behavioural therapy and rehabilitation	
#####	Wednesday	IV9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	SU22.3 Demonstrate and document the correct clinical examination of thyroid swellings and discuss the differential diagnosis and their management	OG8.8 Enumerate the indications and describe the investigations including the use of ultrasound in the initial assessment and monitoring in pregnancy	PE13.3 Identify the clinical features of dietary deficiency of Iron and make a diagnosis PE13.4 Interpret hemogram and Iron Panel PE13.5 Propose a management plan for Fe deficiency anaemia PE13.9 Identify the clinical features of Iodine	End Posting Exam	End Posting Exam	
#####	Thursday	IV9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history	SU25.4 Counsel the patient and obtain informed consent for treatment of malignant conditions of	OG8.8 Enumerate the indications and describe the investigations including the use of ultrasound in the initial	PE15.3 Calculate the fluid and electrolyte requirement in health PE15.4 Interpret electrolyte report PE15.5 Calculate fluid and	PS10.2 Enumerate, elicit, describe and document clinical features in patients with somatoform, dissociative and conversion disorders PS10.3 Enumerate and	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention	

		for anemia Generate a differential diagnosis and prioritise based on clinical features HM 9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	the breast SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a mannequin or equivalent	assessment and monitoring in pregnancy OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation	electrolyte imbalance PE15.6 Demonstrate the steps of inserting an IV cannula in a model PE15.7 Demonstrate the steps of inserting an interosseous line in a mannequin	describe the indications and interpret laboratory and other tests used in PS10.5 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment PS10.6 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment PS12.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosomatic disorders PS12.3 Enumerate and describe the indications and interpret laboratory and other tests of	and treatment of a case CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case
#####	Friday	for anemia Generate a differential diagnosis and prioritise based on clinical features HM 9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	the breast SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a mannequin or equivalent	assessment and monitoring in pregnancy OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation	electrolyte imbalance PE16.2 Assess children <2 months using IMNCI Guidelines PE16.3 Assess children >2 to 5 years using IMNCI guidelines and Stratify Risk	describe the indications and interpret laboratory and other tests used in PS12.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosomatic disorders PS12.3 Enumerate and describe the indications and interpret laboratory and other tests of	and treatment of a case CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case
#####	Saturday	for anemia Generate a differential diagnosis and prioritise based on clinical features HM 9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	the breast SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a mannequin or equivalent	assessment and monitoring in pregnancy OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation	electrolyte imbalance PE16.2 Assess children <2 months using IMNCI Guidelines PE16.3 Assess children >2 to 5 years using IMNCI guidelines and Stratify Risk	describe the indications and interpret laboratory and other tests used in PS12.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosomatic disorders PS12.3 Enumerate and describe the indications and interpret laboratory and other tests of	and treatment of a case CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case
#####	Sunday	Holiday					
#####	Monday	for anemia Generate a differential diagnosis and prioritise based on clinical features HM 9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	the breast SU27.2 Demonstrate the correct examination of the vascular system and enumerate and describe the investigation of vascular disease	assessment and monitoring in pregnancy OG10.1 Define, classify and describe the aetiology, pathogenesis, clinical features, ultrasonography, differential diagnosis and management of antepartum haemorrhage in pregnancy	electrolyte imbalance PE18.3 Conduct Antenatal examination of women independently and apply at-risk approach in antenatal care PE18.4 Provide intra-natal care and conduct a normal delivery in a simulated environment PE18.5 Provide intra-natal care and observe the	describe the indications and interpret laboratory and other tests used in PS12.4 Describe the treatment of PSychosomatic disorders including behavioural, PSychosocial and pharmacologic therapy PS12.6 Enumerate and describe the pharmacologic basis and side effects	and treatment of a case CM 5.7 Describe food hygiene
#####	Tuesday	for anemia Generate a differential diagnosis and prioritise based on clinical features HM 9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	the breast SU27.8 Demonstrate the correct examination of the lymphatic system	assessment and monitoring in pregnancy OG10.1 Define, classify and describe the aetiology, pathogenesis, clinical features, ultrasonography, differential diagnosis and management of antepartum haemorrhage in pregnancy	electrolyte imbalance PE19.6 Assess patient for fitness for immunization and prescribe an age appropriate immunization schedule PE19.7 Educate and counsel a patient for immunization PE19.8 Demonstrate willingness to participate	describe the indications and interpret laboratory and other tests used in PS13.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosexual and gender identity disorders PS13.3 Enumerate and describe the indications and interpret laboratory and other tests of	and treatment of a case CM 1.5 Describe the application of interventions at various levels of prevention
#####	Wednesday	for anemia Generate a differential diagnosis and prioritise based on clinical features HM 9 Elicit document and present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and	the breast SU28.2 Demonstrate the correct technique to examine the patient with hernia and identify	assessment and monitoring in pregnancy OG11.1 Describe the etiopathology, clinical features; diagnosis and investigation, complications, principal	electrolyte imbalance PE19.10 Observe the handling and storing of vaccines PE19.11 Document Immunization in an immunization record PE19.12 Observe the	describe the indications and interpret laboratory and other tests used in PS13.5 Demonstrate family education in a patient with PSychosexual and gender identity disorders in a simulated environment PS13.6 Enumerate and	and treatment of a case CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention

		environmental factors, dietary assessment, previous and concomitant therapy for hypertension	different types of hernias	of management of multiple pregnancies	administration of UIP vaccines	describe the pharmacologic basis and side effects of drugs used in	and treatment of a case
#####	Thursday	IV 8 Elicit document and present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU28.2 Demonstrate the correct technique to examine the patient with hernia and identify different types of hernias	OG11.1 Describe the etiopathology, clinical features; diagnosis and investigation, complications, principal of management of multiple pregnancies	PE19.13 Demonstrate the correct administration of different vaccines in a Mannequin PE19.14 Practice Infection control measures and appropriate handling of the sharps	PS14.2 Enumerate, elicit, describe and document clinical feature patients with PSychiatric disorders occurring in childhood and adolescence PS14.4 Demonstrate family education in a patient with PSychiatry disorders	CM 16.4 Describe health planning in India and National policies related to health and health planning
#####	Friday	IV 8 Elicit document and present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU28.18 Describe and demonstrate clinical examination of abdomen. Order relevant investigations. Describe and discuss appropriate treatment plan	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of pregnancy and eclampsia, complications of eclampsia.	PE20.3 Perform Neonatal resuscitation in a manikin PE20.4 Assessment of a normal neonate	PS14.5 Enumerate and describe the pharmacologic basis and side effects of drugs used in PSychiatric disorders occurring in childhood and adolescence PS14.6 Enumerate the appropriate conditions for specialist referral in	CM 6.3, CM 6.4 Describe, discuss and demonstrate the application of elementary statistical methods including test of significance in various study designs & Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods
#####	Saturday	IV 8 Elicit document and present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU29.11 Describe clinical features, investigations and management of urethral strictures	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of pregnancy and eclampsia, complications of eclampsia.	PE20.5 Counsel / educate mothers on the care of neonates PE20.6 Explain the follow up care for neonates including Breast Feeding, Temperature maintenance, immunization, importance of growth monitoring and red flags	PS15.1 Describe the aetiology and magnitude of mental retardation PS15.2 Describe and discuss intelligence quotient and its measurement PS15.3 Elicit and document a history and clinical examination and choose appropriate investigations	CM 7.4, CM 7.6 Define, calculate and interpret morbidity and mortality indicators based on given set of data & Enumerate and evaluate the need of screening tests
#####	Sunday	Holiday					
#####	Monday	IV 8 Elicit document and present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU30.1 Describe the clinical features, investigations and principles of management of phimosis, paraphimosis and carcinoma penis. SU30.3 Describe the applied anatomy clinical features, investigations and principles of management of	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of pregnancy and eclampsia, complications of eclampsia.	PE20.18 Identify and stratify risk in a sick neonate using IMNCI guidelines	PS16.1 Enumerate and describe common PSychiatric disorders in the elderly including dementia, depression and PSychoosis PS16.2 Describe the aetiology and magnitude of PSychiatric illness in the elderly	CM 9.2 Define, calculate and interpret demographic indices including birth rate, death rate, fertility rates
#####	Tuesday	IV 8 Elicit document and present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and	SU30.1 Describe the clinical features, investigations and principles of management of phimosis, paraphimosis and carcinoma penis. SU30.3 Describe the	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of	PE20.18 Identify and stratify risk in a sick neonate using IMNCI guidelines	PS17.1 Enumerate and describe the recognition and clinical presentation of behavior PSychiatric emergencies (Suicide, Deliberate Self Harm, Violent	CM 5.3 Define and describe common nutrition related health disorders (including macro-PEM, Micro-iron, Zn, iodine, Vit.

		environmental factors, dietary assessment, previous and concomitant therapy for hypertension	applied anatomy clinical features, investigations and principles of management of	pregnancy and eclampsia, complications of eclampsia.		PS17.2 Describe the initial stabilisation and management of PSychiatric emergencies	A), their control and management

BATCHES		D	E	A	B	C1&C2	C2&C1
12/1/2022	Thursday	IV4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU4.1 Elicit document and present history in a case of Burns and perform physical examination. Describe Pathophysiology of Burns	OG5.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss evidence-based intrapartum	PE1.4 Perform Anthropometric measurements, document in growth charts and interpret  PE1.7 Perform Developmental assessment and interpret	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS10.2 Enumerate, elicit, describe and document clinical features in patients with somatoform, dissociative and conversion disorders PS10.3 Enumerate and describe the indications and interpret laboratory and other tests used in
12/2/2022	Friday	IV4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU5.3 Differentiate the various types of wounds, plan and observe management of wounds	OG5.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss evidence-based intrapartum	PE2.2 Assessment of a child with failing to thrive including eliciting an appropriate history and examination  PE2.3 Counseling a parent with failing to thrive child	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS10.5 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment PS10.6 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a
12/3/2022	Saturday	IV4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU5.3 Differentiate the various types of wounds, plan and observe management of wounds	OG5.2 Determine maternal high risk factors and verify immunization status	PE3.3 Assessment of a child with developmental delay - Elicit document and present history  PE3.4 Counsel a parent of a child with developmental delay  PE3.7 Visit a Child Developmental Unit and	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS12.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosomatic disorders PS12.3 Enumerate and describe the indications and interpret laboratory and other tests of
12/4/2022	Sunday	Holiday					
		IV4 Elicit document and present a medical history that helps delineate the aetiology of fever that	SU10.3 Observe common surgical procedures and	OG6.1 Describe, discuss and demonstrate the	PE4.6 Visit to the Child		PS12.4 Describe the treatment of PSychosomatic disorders including

12/5/2022	Monday	includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	assist in minor surgical procedures; Observe emergency lifesaving surgical procedures	clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principal underlying and interpret pregnancy tests.	Guidance Clinic PE5.11 Visit to Child Guidance Clinic and observe functioning	CM 5.7 Describe food hygiene	behavioural, PSychosocial and pharmacologic therapy PS12.6Enumerate and describe the pharmacologic basis and side effects
12/6/2022	Tuesday	IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU11.3 Demonstrate maintenance of an airway in a mannequin or equivalent	OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors.	PE6.8 respecting patient privacy and maintaining confidentiality while dealing with adolescence PE6.9 Perform routine Adolescent Health check up including eliciting history, performing examination including SMR (Sexual Maturity Rating), growth	CM 1.5 Describe the application of interventions at various levels of prevention	PS13.2Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosexual and gender identity disorders PS13.3Enumerate and describe the indications and interpret laboratory and
12/7/2022	Wednesday	IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU11.3 Demonstrate maintenance of an airway in a mannequin or equivalent	OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors.	PE7.5 Observe the correct technique of breast feeding and distinguish wrong right from techniques PE7.7 Perform breast examination and identify common problems during lactation such as retracted nipples, cracked nipples, breast engorgement, breast	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS13.5Demonstrate family education in a patient with PSychosexual and gender identity disorders in a simulated environment PS13.6Enumerate and describe the pharmacologic basis and side effects of drugs used in
12/8/2022	Thursday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	SU14.2 Describe Surgical approaches, incisions and the use of appropriate instruments in Surgery in general	OG8.2 Elicit document and present an obstetric history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history.	PE8.4 Elicit history on the Complementary Feeding habits PE8.5 Counsel and educate mothers on the best practices in Complimentary Feeding	CM 16.4 Describe health planning in India and National policies related to health and health planning	PS14.2Enumerate, elicit, describe and document clinical feature patients with PSychiatric disorders occurring in childhood and adolescence PS14.4 Demonstrate family education in a patient with PSychiatry disorders
12/9/2022	Friday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	OG8.2 Elicit document and present an obstetric history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history.	PE9.4 Elicit document and present an appropriate nutritional history and perform a dietary recall PE9.5 Calculate the age related calorie requirement in Health and Disease and identify gap PE9.6 Assess and classify the nutrition status of infants, children and	CM 6.3, CM 6.4 Describe, discuss and demonstrate the application of elementary statistical methods including test of significance in various study designs & Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods	PS14.5Enumerate and describe the pharmacologic basis and side effects of drugs used in PSychiatric disorders occurring in childhood and adolescence PS14.6Enumerate the appropriate conditions for specialist referral in
#####	Saturday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination,	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated	OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination	PE10.3 Assessment of a patient with SAM and MAM, diagnosis, classification and planning management including hospital and community based	CM 7.4, CM 7.6 Define, calculate and interpret morbidity and mortality indicators based on given set of data & Enumerate	PS15.1Describe the aetiology and magnitude of mental retardation PS15.2Describe and discuss intelligence quotient and its measurement

		including an appropriate abdominal examination	environment	and clinical monitoring of maternal and fetal well-being;	intervention, rehabilitation and prevention PE10.4 Identify children	and evaluate the need of screening tests	PS15.3 Elicit and document a history and clinical examination and choose appropriate investigations
#####	Sunday	Holiday					
#####	Monday	IV 15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU17.10 Demonstrate Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment	OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being;	PE11.3 Assessment of a child with obesity with regard to eliciting history including physical activity, charting and dietary recall  PE11.4 Examination including calculation of BMI, measurement of waist hip ratio, identifying external markers like	CM 9.2 Define, calculate and interpret demographic indices including birth rate, death rate, fertility rates	PS16.1 Enumerate and describe common PSychiatric disorders in the elderly including dementia, depression and PSychosis PS16.2 Describe the aetiology and magnitude of PSychiatric illness in the elderly
#####	Tuesday	IV 15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU17.10 Demonstrate Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment	OG8.4 Describe and demonstrate clinical monitoring of maternal and fetal well-being	PE12.3 Identify the clinical features of dietary deficiency / excess of Vitamin A PE12.4 Diagnose patients with Vitamin A deficiency, classify and plan Management	CM 5.3 Define and describe common nutrition related health disorders (including macro-PEM, Micro-iron, Zn, iodine, Vit. A), their control and management	PS17.1 Enumerate and describe the recognition and clinical presentation of behavior PSychiatric emergencies (Suicide, Deliberate Self Harm, Violent PS17.2 Describe the initial stabilisation and management of PSychiatric emergencies
#####	Wednesday	IV 15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU22.3 Demonstrate and document the correct clinical examination of thyroid swellings and discuss the differential diagnosis and their management	OG8.4 Describe and demonstrate clinical monitoring of maternal and fetal well-being	PE12.17 Identify the clinical features of Vitamin B complex deficiency PE12.18 Diagnose patients with Vitamin B complex deficiency and plan management PE12.21 Identify the clinical features of Vitamin C deficiency	CM 3.4 Describe the concept of solid waste, human excreta and sewage disposal	indications for modified electroconvulsive therapy PS18.3 Enumerate and describe the principles and role of PSychosocial interventions in PSychiatric illness including PSychotherapy, behavioural therapy and rehabilitation
#####	Thursday	IV 9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	SU22.3 Demonstrate and document the correct clinical examination of thyroid swellings and discuss the differential diagnosis and their management	OG8.8 Enumerate the indications and describe the investigations including the use of ultrasound in the initial assessment and monitoring in pregnancy	PE13.3 Identify the clinical features of dietary deficiency of Iron and make a diagnosis PE13.4 Interpret hemogram and Iron Panel PE13.5 Propose a management plan for Fe deficiency anaemia PE13.9 Identify the clinical features of Iodine	End Posting Exam	End Posting Exam
#####	Friday	IV 9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history	SU25.4 Counsel the patient and obtain informed consent for treatment of malignant conditions of	OG8.8 Enumerate the indications and describe the investigations including the use of ultrasound in the initial	PE15.3 Calculate the fluid and electrolyte requirement in health PE15.4 Interpret electrolyte report PE15.5 Calculate fluid and	PS10.2 Enumerate, elicit, describe and document clinical features in patients with somatoform, dissociative and conversion disorders PS10.3 Enumerate and	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention

		for anemia Generate a differential diagnosis and prioritise based on clinical features IM9 Elicit document and	the breast	assessment and monitoring in pregnancy	electrolyte imbalance	describe the indications and interpret laboratory and other tests used in	and treatment of a case
#####	Saturday	present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a mannequin or equivalent	OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation	PE15.6 Demonstrate the steps of inserting an IV cannula in a model PE15.7 Demonstrate the steps of inserting an interosseous line in a mannequin	PS10.5 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment PS10.6 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case
#####	Sunday	Holiday					
#####	Monday	present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features IM9 Elicit document and	SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a mannequin or equivalent	OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation	PE16.2 Assess children <2 months using IMNCI Guidelines PE16.3 Assess children >2 to 5 years using IMNCI guidelines and Stratify Risk	PS12.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSYchosomatic disorders PS12.3 Enumerate and describe the indications and interpret laboratory and other tests of PS12.4	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case
#####	Tuesday	present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features IM9 Elicit document and	SU27.2 Demonstrate the correct examination of the vascular system and enumerate and describe the investigation of vascular disease	OG10.1 Define, classify and describe the aetiology, pathogenesis, clinical features, ultrasonography, differential diagnosis and management of antepartum haemorrhage in pregnancy	PE18.3 Conduct Antenatal examination of women independently and apply at-risk approach in antenatal care PE18.4 Provide intra-natal care and conduct a normal delivery in a simulated environment PE18.5 Provide intra-natal care and observe the	Describe the treatment of PSYchosomatic disorders including behavioural, PSYchosocial and pharmacologic therapy PS12.6 Enumerate and describe the pharmacologic basis and side effects	CM 5.7 Describe food hygiene
#####	Wednesday	present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features IM9 Elicit document and	SU27.8 Demonstrate the correct examination of the lymphatic system	OG10.1 Define, classify and describe the aetiology, pathogenesis, clinical features, ultrasonography, differential diagnosis and management of antepartum haemorrhage in pregnancy	PE19.6 Assess patient for fitness for immunization and prescribe an age appropriate immunization schedule PE19.7 Educate and counsel a patient for immunization PE19.8 Demonstrate willingness to participate	PS13.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSYchosexual and gender identity disorders PS13.3 Enumerate and describe the indications and interpret laboratory	CM 1.5 Describe the application of interventions at various levels of prevention
#####	Thursday	present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and	SU28.2 Demonstrate the correct technique to examine the patient with hernia and identify	OG11.1 Describe the etiopathology, clinical features; diagnosis and investigation, complications, principal	PE19.10 Observe the handling and storing of vaccines PE19.11 Document Immunization in an immunization record PE19.12 Observe the	PS13.5 Demonstrate family education in a patient with PSYchosexual and gender identity disorders in a simulated environment PS13.6 Enumerate and	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention

		environmental factors, dietary assessment, previous and concomitant therapy for hypertension	different types of hernias	of management of multiple pregnancies	administration of UIP vaccines	describe the pharmacologic basis and side effects of drugs used in	and treatment of a case
#####	Friday	present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU28.2 Demonstrate the correct technique to examine the patient with hernia and identify different types of hernias	OG11.1 Describe the etiopathology, clinical features; diagnosis and investigation, complications, principal of management of multiple pregnancies	PE19.13 Demonstrate the correct administration of different vaccines in a Mannequin PE19.14 Practice Infection control measures and appropriate handling of the sharps	PS14.2 Enumerate, elicit, describe and document clinical feature patients with PSYchiatric disorders occurring in childhood and adolescence PS14.4 Demonstrate family education in a patient with PSYchiatry disorders	CM 16.4 Describe health planning in India and National policies related to health and health planning
#####	Saturday	present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU28.18 Describe and demonstrate clinical examination of abdomen. Order relevant investigations. Describe and discuss appropriate treatment plan	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of pregnancy and eclampsia, complications of eclampsia.	PE20.3 Perform Neonatal resuscitation in a manikin PE20.4 Assessment of a normal neonate	PS14.5 Enumerate and describe the pharmacologic basis and side effects of drugs used in PSYchiatric disorders occurring in childhood and adolescence PS14.6 Enumerate the appropriate conditions for specialist referral in	CM 6.3, CM 6.4 Describe, discuss and demonstrate the application of elementary statistical methods including test of significance in various study designs & Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods
25-12-22 to 31-12-22		Winter Vacation					
1/1/2023	Sunday	Holiday					
1/2/2023	Monday	present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU29.11 Describe clinical features, investigations and management of urethral strictures	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of pregnancy and eclampsia, complications of eclampsia.	PE20.5 Counsel / educate mothers on the care of neonates PE20.6 Explain the follow up care for neonates including Breast Feeding, Temperature maintenance, immunization, importance of growth monitoring and red flags	PS15.1 Describe the aetiology and magnitude of mental retardation PS15.2 Describe and discuss intelligence quotient and its measurement PS15.3 Elicit and document a history and clinical examination and choose appropriate investigations	CM 7.4, CM 7.6 Define, calculate and interpret morbidity and mortality indicators based on given set of data & Enumerate and evaluate the need of screening tests
1/3/2023	Tuesday	present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU30.1 Describe the clinical features, investigations and principles of management of phimosis, paraphimosis and carcinoma penis. SU30.3 Describe the applied anatomy clinical features, investigations and principles of management of	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of pregnancy and eclampsia, complications of eclampsia.	PE20.18 Identify and stratify risk in a sick neonate using IMNCI guidelines	PS16.1 Enumerate and describe common PSYchiatric disorders in the elderly including dementia, depression and PSYchosis PS16.2 Describe the aetiology and magnitude of PSYchiatric illness in the elderly	CM 9.2 Define, calculate and interpret demographic indices including birth rate, death rate, fertility rates
1/4/2023	Wednesday	present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and	SU30.1 Describe the clinical features, investigations and principles of management of phimosis, paraphimosis and carcinoma penis. SU30.3 Describe the	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of	PE20.18 Identify and stratify risk in a sick neonate using IMNCI guidelines	PS17.1 Enumerate and describe the recognition and clinical presentation of behavior PSYchiatric emergencies (Suicide, Deliberate Self Harm, Violent	CM 5.3 Define and describe common nutrition related health disorders (including macro-PEM, Micro-iron, Zn, iodine, Vit.

		environmental factors, dietary assessment, previous and concomitant therapy for hypertension	applied anatomy clinical features, investigations and principles of management of	pregnancy and eclampsia, complications of eclampsia.		PS17.2 Describe the initial stabilisation and management of	A), their control and management
1/5/2023	Thursday	IM 8 Elicit document and present a medical history that includes: duration and levels, symptoms, comorbidities, lifestyle, risk factors, family history, psychosocial and environmental factors, dietary assessment, previous and concomitant therapy for hypertension	SU30.1 Describe the clinical features, investigations and principles of management of phimosis, paraphimosis and carcinoma penis. SU30.3 Describe the applied anatomy clinical features, investigations and principles of management of	OG12.1 Define, classify and describe the etiology and pathophysiology, early detection, investigations; principles of management of hypertensive disorders of pregnancy and eclampsia, complications of eclampsia.	PE20.18 Identify and stratify risk in a sick neonate using IMNCI guidelines	PS17.2 Describe the initial stabilisation and management of psychiatric emergencies PS18.3 Enumerate and describe the principles and role of psychosocial interventions in psychiatric illness including psychotherapy, behavioural therapy and rehabilitation	CM 3.4 Describe the concept of solid waste, human excreta and sewage disposal

1/7/2023	Saturday	IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU4.1 Elicit document and present history in a case of Burns and perform physical examination. Describe Pathophysiology of Burns	OG5.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss evidence-based intrapartum	PE1.4 Perform Anthropometric measurements, document in growth charts and interpret  PE1.7 Perform Developmental assessment and interpret	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS10.2 Enumerate, elicit, describe and document clinical features in patients with somatoform, dissociative and conversion disorders PS10.3 Enumerate and describe the indications and interpret laboratory and other tests used in
1/8/2023	Sunday	Holiday					
1/9/2023	Monday	IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through	SU5.3 Differentiate the various types of wounds, plan and observe management of wounds	OG5.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss evidence-based intrapartum	PE2.2 Assessment of a child with failing to thrive including eliciting an appropriate history and examination  PE2.3 Counseling a parent with failing to thrive child	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS10.5 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment PS10.6 Demonstrate family education in a patient with somatoform, dissociative and
		IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that	SU5.3 Differentiate the	OG5.1 Describe, discuss and identify pre-existing medical disorders and discuss their management; discuss evidence-based intrapartum	PE3.3 Assessment of a child with developmental delay - Elicit document and present history	CM 8.3 Enumerate and	PS10.7 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment PS12.2 Enumerate, elicit, describe and document clinical features in patients with magnitude

1/10/2023	Tuesday	includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	various types of wounds, plan and observe management of wounds	OG5.2 Determine maternal high risk factors and verify immunization status	PE3.4 Counsel a parent of a child with developmental delay  PE3.7 Visit a Child Developmental Unit and	describe disease specific National Health Programs including their prevention and treatment of a case	and etiology of PSychosomatic disorders PS12.3 Enumerate and describe the indications and interpret laboratory and other tests of	
1/11/2023	Wednesday	IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU10.3 Observe common surgical procedures and assist in minor surgical procedures; Observe emergency lifesaving surgical procedures	OG6.1 Describe, discuss and demonstrate the clinical features of pregnancy, derive and discuss its differential diagnosis, elaborate the principal underlying and interpret pregnancy tests.	PE4.6 Visit to the Child Guidance Clinic PE5.11 Visit to Child Guidance Clinic and observe functioning	CM 5.7 Describe food hygiene	Describe the treatment of PSychosomatic disorders including behavioural, PSychosocial and pharmacologic therapy PS12.6 Enumerate and describe the pharmacologic basis and side effects	
1/12/2023	Thursday	IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU11.3 Demonstrate maintenance of an airway in a mannequin or equivalent	OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors.	PE6.8 respecting patient privacy and maintaining confidentiality while dealing with adolescence PE6.9 Perform routine Adolescent Health check up including eliciting history, performing examination including SMR (Sexual Maturity Rating) growth	CM 1.5 Describe the application of interventions at various levels of prevention	PS13.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of PSychosexual and gender identity disorders PS13.3 Enumerate and describe the indications and interpret laboratory and	
1/13/2023	Friday	IM 4 Elicit document and present a medical history that helps delineate the aetiology of fever that includes the evolution and pattern of fever, associated symptoms, immune status, comorbidities, risk factors, exposure through occupation, travel and	SU11.3 Demonstrate maintenance of an airway in a mannequin or equivalent	OG8.1 Enumerate, describe and discuss the objectives of antenatal care, assessment of period of gestation; screening for high-risk factors.	PE7.5 Observe the correct technique of breast feeding and distinguish wrong right from techniques PE7.7 Perform breast examination and identify common problems during lactation such as retracted nipples, cracked nipples, breast engorgement breast	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case	PS13.5 Demonstrate family education in a patient with PSychosexual and gender identity disorders in a simulated environment PS13.6 Enumerate and describe the pharmacologic basis and side effects of drugs used in	
1/14/2023	Saturday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	SU14.2 Describe Surgical approaches, incisions and the use of appropriate instruments in Surgery in general	OG8.2 Elicit document and present an obstetric history including menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history.	PE8.4 Elicit history on the Complementary Feeding habits PE8.5 Counsel and educate mothers on the best practices in Complimentary Feeding	CM 16.4 Describe health planning in India and National policies related to health and health planning	PS14.2 Enumerate, elicit, describe and document clinical feature patients with PSychiatric disorders occurring in childhood and adolescence PS14.4 Demonstrate family education in a patient with PSychiatry disorders	
1/15/2023	Sunday	Holiday						
		IM 16 Perform, document and	SU17.2 Demonstrate the	OG8.2 Elicit document and present an obstetric history including	PE9.4 Elicit document and present an appropriate nutritional history and perform a dietary recall	CM 6.3, CM 6.4 Describe, discuss and demonstrate the application of elementary statistical	PS14.5 Enumerate and describe the pharmacologic basis and side effects	

1/16/2023	Monday	demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	steps in Basic Life Support. Transport of injured patient in a simulated environment	menstrual history, last menstrual period, previous obstetric history, comorbid conditions, past medical history and surgical history.	PE9.5 Calculate the age related calorie requirement in Health and Disease and identify gap PE9.6 Assess and classify the nutrition status of infants, children and patient with SAM and MAM, diagnosis, classification and planning management including hospital and community based intervention, rehabilitation and prevention PE10.3 Assessment of a child with obesity with regard to eliciting history including physical activity, charting and dietary recall	methods including test of significance in various study designs & Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods	of drugs used in PSychiatric disorders occurring in childhood and adolescence PS14.6 Enumerate the appropriate conditions for specialist referral in PS15.1 Describe the aetiology and magnitude of mental retardation PS15.2 Describe and discuss intelligence quotient and its measurement PS15.3 Elicit and document a history and clinical examination and choose appropriate investigations
1/17/2023	Tuesday	IM 16 Perform, document and demonstrate a physical examination based on the history that includes general examination, including an appropriate abdominal examination	SU17.2 Demonstrate the steps in Basic Life Support. Transport of injured patient in a simulated environment	OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being;	PE10.4 Identify children PE11.3 Assessment of a child with obesity with regard to eliciting history including physical activity, charting and dietary recall PE11.4 Examination including calculation of BMI, measurement of waist hip ratio, identifying external markers like	CM 7.4, CM 7.6 Define, calculate and interpret morbidity and mortality indicators based on given set of data & Enumerate and evaluate the need of screening tests	PS16.1 Enumerate and describe common PSychiatric disorders in the elderly including dementia, depression and PSychosis PS16.2 Describe the aetiology and magnitude of PSychiatric illness in the elderly
1/18/2023	Wednesday	IM 15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment SU29.11 Describe clinical features, investigations and management of urethral strictures	OG8.3 Describe, demonstrate, document and perform an obstetrical examination including a general and abdominal examination and clinical monitoring of maternal and fetal well-being;	PE12.3 Identify the clinical features of dietary deficiency / excess of Vitamin A PE12.4 Diagnose patients with Vitamin A deficiency, classify and plan Management PE12.17 Identify the clinical features of Vitamin B complex deficiency PE12.18 Diagnose patients with Vitamin B complex deficiency and plan management PE12.21 Identify the clinical features of Vitamin C deficiency PE19.10 Observe the	CM 9.2 Define, calculate and interpret demographic indices including birth rate, death rate, fertility rates	PS17.1 Enumerate and describe the recognition and clinical presentation of behavior PSychiatric emergencies (Suicide, Deliberate Self Harm, Violent PS17.2 Describe the initial stabilisation and management of PSychiatric emergencies
1/19/2023	Thursday	IM 15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU17.10 Demonstrate Airway maintenance. Recognize and manage tension pneumothorax, hemothorax and flail chest in simulated environment	OG8.4 Describe and demonstrate clinical monitoring of maternal and fetal well-being	PE13.3 Identify the clinical features of Iron and make a diagnosis PE13.4 Interpret hemogram and Iron Panel PE13.5 Propose a	CM 5.3 Define and describe common nutrition related health disorders (including macro-PEM, Micro-iron, Zn, iodine, Vit. A), their control and management	PS17.1 Enumerate and describe the recognition and clinical presentation of behavior PSychiatric emergencies (Suicide, Deliberate Self Harm, Violent PS17.2 Describe the initial stabilisation and management of PSychiatric emergencies
1/20/2023	Friday	IM 15 Elicit and document and present an appropriate history that identifies the route of bleeding, quantity, grade, volume loss, duration, etiology, comorbid illnesses and risk factors Perform, demonstrate and document a physical examination based on	SU22.3 Demonstrate and document the correct clinical examination of thyroid swellings and discuss the differential diagnosis and their management SU27.8 Demonstrate the correct examination of the lymphatic system	OG8.4 Describe and demonstrate clinical monitoring of maternal and fetal well-being	PE13.3 Identify the clinical features of Iron and make a diagnosis PE13.4 Interpret hemogram and Iron Panel PE13.5 Propose a	End Posting Exam	End Posting Exam
1/21/2023	Saturday	IM 9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history	SU22.3 Demonstrate and document the correct clinical examination of thyroid swellings and discuss the differential diagnosis and their management	OG8.8 Enumerate the indications and describe the investigations including the use of ultrasound in the initial	PE13.3 Identify the clinical features of Iron and make a diagnosis PE13.4 Interpret hemogram and Iron Panel PE13.5 Propose a	PS10.2 Enumerate, elicit, describe and document clinical features in patients with somatoform, dissociative and conversion disorders PS10.3 Enumerate and	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention

		for anemia Generate a differential diagnosis and prioritise based on clinical features	SU28.2 Demonstrate the correct technique to examine the patient with hernia and identify	assessment and monitoring in pregnancy	management plan for Fe deficiency anaemia PE13.9 Identify the clinical features of Iodine	describe the indications and interpret laboratory and other tests used in	and treatment of a case
1/22/2023	Sunday	Holiday					
1/23/2023	Monday	IM9.9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	SU25.4 Counsel the patient and obtain informed consent for treatment of malignant conditions of the breast	OG8.8 Enumerate the indications and describe the investigations including the use of ultrasound in the initial assessment and monitoring in pregnancy OG10.1 Define, classify and describe the aetiology, pathogenesis, clinical features	and electrolyte requirement in health PE15.4 Interpret electrolyte report PE15.5 Calculate fluid and electrolyte imbalance PE20.3 Perform Neonatal resuscitation in a manikin PE20.4 Assessment of a normal neonate	PS10.5 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment PS10.6 Demonstrate family education in a patient with somatoform, dissociative and conversion disorders in a simulated environment	CM 5.7 Describe food hygiene
1/24/2023	Tuesday	IM9.9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a mannequin or equivalent SU28.18 Describe and demonstrate clinical examination of abdomen. Order relevant investigations. Describe and discuss appropriate	OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation OG11.1 Describe the etiopathology, clinical features; diagnosis and investigation, complications, principal of management of multiple pregnancies	PE15.6 Demonstrate the steps of inserting an IV cannula in a model PE15.7 Demonstrate the steps of inserting an interosseous line in a mannequin PE20.5 Counsel / educate mothers on the care of neonates	PS12.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of Psychosomatic disorders PS12.3 Enumerate and describe the indications and interpret laboratory and other tests of	CM 1.5 Describe the application of interventions at various levels of prevention
1/25/2023	Wednesday	IM9.9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a mannequin or equivalent	OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation	PE16.2 Assess children <2 months using IMNCI Guidelines PE16.3 Assess children >2 to 5 years using IMNCI guidelines and Stratify Risk PE20.6 Explain the follow up care for neonates including Breast Feeding, Temperature	PS12.4 Describe the treatment of Psychosomatic disorders including behavioural, Psychosocial and pharmacologic therapy PS12.6 Enumerate and describe the pharmacologic basis and side effects	CM 8.3 Enumerate and describe disease specific National Health Programs including their prevention and treatment of a case
1/26/2023	Thursday	Republic Day					
1/27/2023	Friday	IM9.9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history for anemia Generate a differential diagnosis and prioritise based on clinical features	SU27.2 Demonstrate the correct examination of the vascular system and enumerate and describe the investigation of vascular disease SU30.1 Describe the clinical features, investigations and principles of management of phimosis, paraphimosis and	OG10.1 Define, classify and describe the aetiology, pathogenesis, clinical features, ultrasonography, differential diagnosis and management of antepartum haemorrhage in pregnancy OG12.1 Define, classify and describe the etiology and	PE16.2 Assess children <2 months using IMNCI Guidelines PE16.3 Assess children >2 to 5 years using IMNCI guidelines and Stratify Risk PE20.6 Explain the follow up care for neonates including Breast Feeding, Temperature	PS13.2 Enumerate, elicit, describe and document clinical features in patients with magnitude and etiology of Psychosexual and gender identity disorders PS13.3 Enumerate and describe the indications and interpret laboratory and	CM 16.4 Describe health planning in India and National policies related to health and health planning
1/28/2023	Saturday	IM9.9 Elicit document and present a medical history that includes symptoms, risk factors including GI bleeding, prior history, medications, menstrual history, and family history	SU25.5 Demonstrate the correct technique to palpate the breast for breast swelling in a	OG9.2 Describe the steps and observe/assist in the performance of an MTP evacuation	PE16.3 Conduct Antenatal examination of women independently and apply at-risk approach in antenatal care PE18.4 Provide intra-natal care and conduct a normal	PS13.5 Demonstrate family education in a patient with Psychosexual and gender identity disorders in a simulated environment PS13.6 Enumerate and	CM 6.3, CM 6.4 Describe, discuss and demonstrate the application of elementary statistical methods including test of significance in various study designs &

		for anemia Generate a differential diagnosis and prioritise based on clinical features	mannequin or equivalent		delivery in a simulated environment PE18.5 Provide intra-natal care and observe the	describe the pharmacologic basis and side effects of drugs used in	Enumerate, discuss and demonstrate common sampling techniques, simple statistical methods
